version(s) i had to remove the acrobat folder (appdata) and run acrobat.exe -CheckForUpdates for any updates. This was the whole process and it is pretty easy. Hope this helps somebody. Q: What is the limit of the following integral? I found this integral in a book, but I do not know if there is a closed form of it.  $\lim_{a \rightarrow 0} \int_0^\infty \frac{x^{a-1}}{x^a+1} dx$  Thanks! A: Let  $x = e^{-t}$  where  $y$  ranges over the upper half-plane  $y > 0$ :  $\int_0^\infty \frac{x^{a-1}}{x^a+1} dx = \int_0^\infty \frac{y^{a-1}}{y^a+1} dy$  The integral is known as the gamma function  $\Gamma(a)$ , and we have  $\Gamma(a) = \frac{\pi}{\sin \pi a}$  when  $a \in \mathbb{N}$ . Use of the erythromycin breath test to measure ileal amino acid digestibility in the chicken. Three experiments were conducted to determine the ileal amino acid digestibility in broiler chickens. In Exp. 1, a total of 960 growing broiler chickens were used to measure the digestibility of 15 amino acids from 7 to 22 d of age. In Exp. 2, five growing and five finishing broiler chickens were fed the same basal diet as in Exp. 1 for 4 wk. In Exp. 3, 27 21-d-old broiler chickens were used to measure the ileal amino acid digestibility of four diets containing graded levels of protein. The ileal amino acid digestibility was calculated from the ratio of the metabolized to ingested amino acids and nitrogen balance. In the 5- to 22-d-old birds, the ileal digestibility of Lys, Met, Ile, Phe, His, Thr, and Val increased from the 7-d-old to the 22-d-old period, whereas that of Trp, Leu, and Tyr decreased. In the 21-d-old birds, the ileal digestibility
