The automated activation tool has an active scan engine that will automatically identify and fix a variety of common system errors. The activation will fix startup errors, missing file errors, missing DLL files, invalid software paths or file locations, and more. The activation will also install updates for you, so you don't have to worry about the latest system updates. If your serial key was sent to you in an email it should already be activated. If it wasn't, you will have to activate it from within Parallels Desktop 8 in the Parallels Desktop 8 settings. Click on 'Parallels' at the top left of the Parallels Desktop 8 main window. Select 'Add-ons' in the Parallels Desktop 8 settings menu. Under 'System Add-ons' select 'Parallels Activation Tool' and then 'Activate'. When finished click on 'OK'. System requirements Parallels Desktop is a Windows application that requires an Intel or AMD 32- or 64-bit processor, 2GB of RAM, and a minimum of 16GB of free hard disk space. We encourage you to use the included system requirements document as a guide when running Parallels Desktop. It includes recommended system specifications for Parallels Desktop, which should ensure you have adequate resources to run it and work efficiently. For best results, we recommend using the latest versions of Windows and Mac operating systems, as we get frequent updates and will regularly offer new updates to improve the performance of Parallels Desktop, as well as other Parallels software.
