Opinions are those of the individual authors and not necessarily the position of the United States government. You can follow this topic on social media by subscribing to our Facebook page or Twitter feed.] The economic history of the United States is a tale of progress, a country that has progressed out of the wilderness. "Many countries," writes the late economist John Kenneth Galbraith, "in what seem today to have been the midst of a stagnant or even regressive economy, have over the past centuries experienced a process of steady progress, for which the United States is the classic example. Indeed, perhaps one of the greatest achievements of the United States in modern history has been its remarkable progress." We must not make the mistake of thinking that we must squelch all progress, but we must also not forget that progress has no inherent moral quality. Progress is not an ethical or moral concept. That idea raises another troubling question: Are all moral concepts political? That is, should the state be entrusted with setting the law, the individual with the moral code? Moral Codes Are Wrong, Even on the Individual Level All moral codes are wrong — even on the individual level. The point of morality is to help people function better, and to help bring out the best in them. Moral codes don't aim to bring out the best in people. Morality must be constructed around and be informed by reality. If the individual
