To evaluate the surgical outcome of Chinese patients with intracranial germ cell tumours (GCTs). A retrospective analysis of 32 Chinese patients with intracranial GCTs was performed from January 2000 to July 2009. Patient outcomes were analyzed by the WHO 2000 criteria. A total of 9 patients (28.1%) achieved gross total resection (GTR), and 13 patients (40.6%) achieved subtotal resection (STR). Eight patients (25.0%) had postoperative radiotherapy. The overall 2-year progression-free survival (PFS) rate was 78.8%, and the overall 2-year overall survival (OS) rate was 95.0%. The 2-year PFS rate was 100% for patients who achieved GTR and 94.3% for patients who achieved STR (P > 0.05). The 2-year PFS rate was 95.6% for patients with disease confined to the supratentorial compartment and 68.2% for patients with disease that had extended into the infratentorial compartment (P 0.05). The 2-year OS rate was 100% for patients with disease confined to the supratentorial compartment and 80.8% for patients with disease that had extended into the infratentorial compartment (P Q: Getting around the 'get' way of accessing model instances I think that the answer to this question is pretty much right here in the PHP manual, but I don't know how to use it, so I'll ask it like I'd 520fdb1ae7
