COMPANY FACT SHEET

DECEMBER 2018

Company Overview	SwissDeCode was founded in 2016, with the vision to build trust and secure the global food value chain. Based near Lausanne, the company helps food manufacturers and farmers to grow and produce food that is safe to eat by delivering real time certification of authenticity, safety and quality of products, processes and premises. A spin-off from the University of Geneva, SwissDeCode's patented tools and processes are recognized by the Swiss Commission for Technology and Innovation (InnoSuisse) and independently validated by Swiss Federal Laboratories.
