Explosive Items Explosive Items by RexBrick4241367 4 Another random command I made. Now you can use 4 more TNT related items. Click on the 'Get Items' sign to get them. Or watch the video to learn how you can make them yourself! Thanks, see you next time! Minecraft 1.8.7+ 20116 characters More of RexBrick How to install How to import this command in your world First you need to give yourself a command block (If you are on a server you must be 'OP'ed, and have access to /gamemode 1) To get a command block, type /give @p command_block in the chat. When you have a command block, right click on it to open it's GUI. Now you need to copy and paste the command from your browser into the game. Select the entire command from below, then right-click, and then press 'copy'. Then you go back to your minecraft world, and paste the command you just copied into the command pad. There are a few different keys that can be used to do this, depending on your keyboard. The most common are 'CTRL +V', 'COMMAND +V', or 'STRG+V' Finally, you can press done to exit the GUI, and perform the command block by powering it with a redstone block, a lever, or anything you can get your dirty hands on. Just make sure you don't place it on top of the command block, or the machine won't be installed!
