Relative Regional Importance Code	Description
1	widespread/frequent major structural/floristic component
2	widespread/frequent minor structural/floristic component
3	restricted/infrequent major structural/floristic component
4	restricted/infrequent minor structural/floristic component
5	widespread/frequent negligible structural/floristic component
6	restricted/infrequent negligible structural/floristic component
	Note: The intent of this parameter is to define relative species

Growth Cycle	Description
annual	complete in 12 months; lives 1 year/season
biennial	complete in 12-24 months; lives 2 years/seasons: growth 1st year &
perennial	complete in >2 years/seasons; lives >2 years
annual/biennial	annual or biennial
annual/perennial	annual or perennial
biennial/perennial	biennial or perennial
unknown/no-data	unknown/no-data

Key 'Grassy'	Description
Y	Yes: Relative Regional Importance < or = 3, & 'Grassy' Vegetation
N	No: Relative Regional Importance > 3, & 'Grassy' Vegetation
	Note: The intent of this parameter is to define relative species

Yellow Highlight	Identified in Cromer and/or PRM species list

Trials Priority	Description
1	Highest priority for trials
2	Lower priority for trials

Location	Description
Cr	Cromer trial sites
PRM	PRM Conservation Cluster trial sites
