## Firmware Samsung GTc3350 BI

**DOWNLOAD:** <https://byltly.com/2ijzr6>

ops es), and just so we're clear, the "product" in the "where do I find" is the specific "biops es" model, not just the biops model, right? arghx: "samsung gtc3350" is a brand, "biops es" is a product line MoPac: which doesn't relate to how the computer was made at all arghx: My question is specifically about that particular biops es model arghx: If you have a Samsung GTC3000, the

---

gtc3350 is a modified model of it. arghx: The product line is the same regardless of which brand of computer you buy, right? MoPac: No. MoPac: that's wrong. from the manufacturer standpoint it does. but from the consumer standpoint it doesn't arghx: So you mean you're saying that to be able to search for "samsung gtc3350 biops es" and not "samsung gtc3350" I'll have to do "samsung gtc3350"? MoPac: yes. MoPac: But you can search for "product line" too. hi, in 12.10, what is the equivalent of /etc/init.d/networking restart? That makes no sense to me MoPac: Dont be misled by someone who does not know the technical differences between brands and models. MoPac: this is what I meant with the "concept of product" fuzzyhc: what do you want to do? k1l\_, i want to make sure that the last rules in /etc/sysctl.d are applied after networking restart fuzzyhc: What do you want to do with that? arghx: I'm not following you. You said "of a specific model" and I'm asking if "of a specific model" is, in fact, the only way to search for that product 520fdb1ae7
