Cpl(customized pixel launcher apk download

The APK ToolsThe CPL project began as a Rootless Pixel Launcher fork from Amirsaidi, which added support to Google's news feed and the At First Sight widget to AOSP Launcher3, and added many fixes to the original AOSP version. Gradually, CPL became a separate project, which provides many options for customizing and fine-tuning the interface. Notes to the Play Market version: 1. Full list of features, solving some problems and other useful (and not quite) information can be found on the forum 4pda: . To ensure that Google weather and news feeds are displayed, you need to install an additional plug-in app that can be found on the 4pda forum at the above link or on the GitHub page: . The application was designed for devices with a clean Android, so the successful launch and operation of all features on third-party shells (MIUI, EMUI, Samsung Experience, etc.) is not guaranteed.4. The app asks for admin rights to lock the screen; in some cases, a preliminary revocation of the application is required to remove the application.
