Bobiverse is a sci-fi series of books written by Dennis E. Taylor, Future Books Book 4: River of Heaven (with a sound for production) Bobiverse series SummaryEdit Bobiverse is the story of Robert Bob Johansson, who, having become financially independent by selling his software company, decides to spend some of his money by contracting to his head cryonically frozen the idea that his head will be saved until then until the technology allows the body to grow and its melt head is attached to it - thus resuming life. The next day he died unexpectedly in a car accident, and his contract is activated. He wakes up 117 years later and discovers that he was collected from his frozen disembodied head and installed in a computer matrix as artificial intelligence. The world has changed a lot. Bob is currently owned by Applied Synergetics Inc, which is in economic competition with Total Cyber Systems to supply the company with robotic servants. The lead scientist accused of bringing Bob online Dr Landers. Bob's first task is to communicate with the GUPPI interface to interact with peripheral systems. Dr. Landers tells a geopolitical story and begins preparations for Bob's mission: an interplanetary expedition as von Neumann's first probe. We Are Legion (We Are Bob) Book 1 (released September 20, 2016) Edith Bob Johansson has just sold her software company and is looking forward to living for a vacation. There are places to go, books to read, and movies to watch. So it's a little unfair when he gets killed crossing the street. Bob wakes up 117 years later to find the enclosure declared without rights, and now he is a state property called FAITH. It has been loaded into computer equipment and is scheduled to be controlling AI in an interstellar probe in search of habitable planets. The stakes are high: no less than the first claims to entire worlds. If he gives up the honor, he'll be turned off, and they'll try again with someone else. If he agrees, he becomes the main target. There are at least three other countries trying to get their own probes launched first and they are playing dirty. The safest place for Bob is in space, having moved away from Earth at high speed. Or so he thinks. Because the universe is full of nasties, and the intruders make them crazy - very crazy. Robert Bob Johansson recently sold his software development company, InterGator Software, a rival company, Terasoft, for a significant amount of money. InterGator is a software development company that has developed a leading engineering and analytical application. During a visit to a convention in Las Vegas, Robert Johansson killed when a car him at a pedestrian crossing. Bob was on his way to dinner with the first staff, and now the main basic basic Holders, in InterGator software; Carl, Karen and Alan. Bob lives in San Diego. He is emotionally close to his twin sisters Andrea and Alena and his parents, who live in Minnesota. For We Are Many Book 2 (released April 18, 2017) edit the second book in the Bobiverse series.
