Oct 04, 2014 189,264 views of Minecraft Mods Zahn Minimap (VoxelMap) Maud is very convenient. It will show a large chunk of the area you are in at the moment in a small window in the top right to the right of the screen. So you can see where to go. Screenshots: New marker of death! The spot of your last death is marked on the map. In the latest version; Capture 1.3.2i in the new PMC radar mode! Crowd icons on minimap. In the latest version, Grab 1.4.2 on PMC icons see through when the crowd is higher. The icons are darkened when the crowd is below: Waypoint Beacons's minimap is a rather famous mini-fashion card, created by Zahn How to install The Minimap Mod zana for Minecraft: Non Forge version: Open a new launcher and make sure that the Minecraft version of mod requires is already installed. Click the Change Profile button in the launcher and then open the game catalog. Go to the subflander version. Rename the folder for the version you need to something else. In this example, we'll rename 1.7.2 in 1.7.2_Zanminimap. Open the data 1.7.2_Zanminimap folder. Rename 1.7.2.jar in 1.7.2_Zanminimap.jar. Rename 1.7.2.json in 1.7.2_Zanminimap.json. Open 1.7.2_Zanminimap.json with a text editor and replace id:1.7.2 on id:1.7.2_Zanminimap, save the file and close it. Unzip mod file and copy all files in 1.7.2_Zanminimap.jar. Until you close the archive. Remove meta-INF and close the archivist. Start a new launcher. Click the Change Profile button in the Usage Version, select 1.7.2_Zanminimap. Click Save Profile. Sign in and play as usual. Forge version: Download and install Minecraft Forge (for 1.7.2 or older) or LiteLoader (for 1.7.10) Download mod Go to %appdata% Go to .minecraft /mods the Drag folder and drop the loaded jar (zip) file into it if one does not exist, You Can Create One Enjoy Mod Tutorial Video: Download Links: For 1.5.2 The Usual Version: For 1.2 Standard version: Modloader/Forge version: Forge 1.6.4 Standard version: Modloader/Forge version: For 1.7.2 non-Forge version: version Forge: For Minecraft 1.7.10 Fashion Author VoxelMap: MaOtaru The | 4 weeks ago | 3,449,979 views of VoxelMap Mod 1.16.3/1.15.2 was originally a mini-map of zana, a rather famous mini-fashion card, created by Zaneris. VoxelMap mini-cards in the game a few good features. It displays the points of the path (in the measurement and in the multiverse world if the server is running voxelPlugin). It also displays crowd (and player) badges with additional helmets and player names. The path points can be edited or removed at any time, with a light user interface to select their color. In SP (with commands enabled) or mp with sufficient permission, the user can teleport to any point of the way. Features in Neder. It has a convenient cave mode. for underground reconnaissance. Screenshots: Lighthouse Mode: Show the point of the path in the world of Cave Mode Site your latest death marked on the slopemap style map for terrain New functionality of the Old School squaremap radar (with waypoints) Nethermap with waypoints Required: Minecraft Forge (for Minecraft 1.12.2) LiteLoadload (For Minecraft 1.7.10) Fabric Modloader (for Minecraft 1.14) Fabric API (for Minecraft 1.14) How to install: Make sure you've already installed Minecraft Forge or LiteLoader or Fabric Modloader. Find the Minecraft app folder. On the windows open Run from the Start Menu, enter %appdata% and click Run. On the Mac open finder, hold the ALT and click Go then library to the top bar menu. Open your app support folder and look for Minecraft. Place the mod you've just downloaded (.litemod or file jars) in the Mod folder. When you run Minecraft and click the mods now you have to see the mod installed. The greatest features about this fashion coordinates and compass and these two will help you a lot! Sometimes finding something can get boring or it can get annoying because Minecraft cards are big enough so you can spend hours to days if you're looking for something. But hey! You remember how fashion changed the last time, right? That's why you don't have to worry, because there is at least one solution that will solve your problems. Waypoints and customization setting point paths are easy, all you have to do is go to the menu and choose a point of path for the place you want to explore. You can change the color of each point of the path instead of entering names for each one. You can also customize the entire mini-card so that it will be more unique. You can change colors, size and manipulate them the way you want, so eventually it will look exactly as you imagine it. Not only is the color, size and transparency, but you can also set the layout of the mini card on the screen, so it's a good feature too! Go to the developer's website... The Minimap of zana (also known as VoxelMap) adds a fully functional mini-card (like the ones in WoW, Guildwars) to the right corner of the screen. The minima map of zana is very similar to the Minima map of Rey, but it has some additional options for It has square map support, path point beacons, death marker and better rendering. It is also updated quickly as soon as the new version of Minecraft is released. Mod Features: - Support Aliens Traffic Tracker and Retro Sun Direction Mod - Best Height Indicator for Mobs - Death Marker shows your latest location of death - square shape minimap - Graphic menu to change map details - Radar Mod for multiplayer - Extra texture packs supported - A few languages supportedGo for the developer of the website ... Installation instructions (without Modinstaller) Forge Mods Open a new launcher and make sure that the Minecraft mod version requires already installed. Download Forge-Auto-Installer compatible with your version of Minecraft Set Minecraft Forge using Auto-Installer Download Mod in the right Forge column here Click Change Profile in the Minecraft launcher, and then open the game's catalog Extract downloaded email file directly in the first folder of the game's catalog Select new Profile Forge and Minecraft version, such as 1.7.10.10. Sign in and play as usual. Modloader Mods Open the new launcher and make sure that the Minecraft mod version requires already installed. Click the Change Profile button in the launcher and then open the Game Go catalog in the subflander version. Rename the folder for the version you need to something else. In this example, we'll rename 1.7.10 in 1.7.10_Mods. Open the 1.7.10_Mods folder. Rename 1.7.10.jar in 1.7.10_Mods.jar. Rename 1.7.10.json in 1.7.10_Mods.json. Open 1.7.10_Mods.json with a text editor and replace id:1.7.10 on id:1.7.10_Mods, save the file and close it. Open the cool files from the fashion with the help of the archive (7-sip) and insert files into the 1.7.10_Mods.jar. Until you close the archive. Remove meta-INF and close the archivist. Start the Minecraft launcher. Click on the Change Profile button in the Use version, select 1.7.10_Mods. Click Save Profile. Sign in and play as usual.
