To suit the post-pandemic world, travel agencies globally are adjusting their programs. Booking.com has updated its loyalty program, Genius, offering benefits for partners and travelers alike. This expansion may impact hotels' direct bookings or help save money. If you've partnered with Booking.com, maximizing your Booking Genius level can reap additional benefits. Booking.com is a widely used online booking portal with 28 million listings across 70 countries in 43 languages. It's not a hotel chain but lists properties for users to book. The platform offers user-friendly interface, best deals, free cancellation, and competitive prices. Booking.com's loyalty program, Genius, rewards frequent users with travel points based on bookings. The more you book, the more rewards you unlock, available only on participating hotels or resorts. There are three levels: Genius Level 1 (10 stays, 10% discount), Level 2 (25 stays, 15% discount and free room upgrades), and Level 3 (35 stays, 20% discount and free breakfast). To get late check-out privileges, subject to availability, you need to climb the Booking.com Genius levels. The first step is to sign up on their platform and complete two stays within a span of two years to unlock Level 1 perks. At this level, you'll enjoy a 10% discount on hotel stays before taxes and charges. To move to Level 2, you must complete at least five stays in two years, which brings benefits like up to 15% discounts, free breakfast, and room upgrades. To reach the top tier - Level 3 - you need to finish at least 15 stays within a two-year period. This unlocks perks such as 10-20% discounts, complimentary breakfasts, and support from live agents for all bookings. The more you travel, the higher your Genius level will be, granting access to even more exclusive benefits. As a valued traveler, it's crucial to maximize your Booking Genius levels. With each level up, you'll unlock new perks like instant discounts, early check-ins, late check-outs, and direct support from live agents. If you complete two stays, you can unlock lifetime free access to Genius Level 1 benefits. This includes a 10% instant discount on all hotel bookings at eligible properties. The next step is to upgrade your level to Level 2 by booking at least 5 stays within two years. You can easily complete these stays for business or vacation purposes as long as the booked property has the Genius tag. Once you complete 5 successful stays, you will get free lifelong access to Level 2 benefits, which include 10% to 15% discounts on hotel stays, free room upgrades, and complimentary breakfasts. To upgrade to Genius Level 3, you must complete at least 15 stays within two years at participating properties. This may seem challenging but remember that you don't need to book a high-end hotel; you can stay even at hostels or small hotels as long as they are tied up with the Genius program. Once you complete 15 stays, you unlock free lifetime access to Level 3 perks, including 10% to 20% discounts on stay prices, complimentary breakfasts, and free room upgrades. You also get access to talk to live agents about your bookings. Booking.com Genius levels aren't as complicated as you might think; pay attention to the requirements to upgrade. Every stay with Booking.com will count towards maximizing your Genius levels and getting eligible for all the perks. Participating properties in the Booking Genius program can increase their business ranking and visibility through special tagging. Data shows that partners who join the Booking Genius program increase their booking rate by 29% and revenue by 24%. Hotels joining Booking Genius levels depend on their country and location, making only high-quality services eligible to participate. To join, each property must meet certain criteria: be open and bookable on Booking, have at least three guest reviews with a minimum score of 7.5. Exceptions are available for hotels if the city or area's average review score is below 7.5 but their guest review score is above that average. By joining the Genius level loyalty program, hotels can get an instant 10% discount on their most populated and least expensive room type, along with access to the Genius report, which provides real-time statistics to help track ROI. Hotels need to offer attractive deals to engage more guests and encourage bookings. As a Genius partner, they provide a mandatory 10% discount on bookings, significantly boosting their business performance. To stand out from other properties and attract higher-level guests, hotels can consider offering customized perks or additional benefits while using an intelligent booking engine for a seamless experience. Booking.com's vision is to help its property partners gain more visibility, increase booking rates, and boost business growth through the Genius program's evolution. This aims to bring even more value to Genius properties by providing flexibility that partner properties need now more than ever.
