A new trove of 1,400 tablets from a lost city in Iraq, clues to the massive void in the Great Pyramid and the discovery of an ancient Easter egg made to honor the Russian royal family are just some of the cost archaeological discoveries we could see in 2019. The Great Pyramid of Cheops was built by the Egyptians to be the largest structure ever built. It is the largest pyramid ever built by the Egyptians. Photo courtesy of Diego Delso/Wikipedia

Researchers don't know how old they are or what purpose they served. Some experts believe that the ruts basket was created by heavy carts that have moved tons of stones, but this is an unlikely explanation as archaeological discoveries show that the ruts were created by the Incas.
