What did the Thirteenth Amendment to the Constitution do?

The Thirteenth Amendment to the United States Constitution, adopted on December 6, 1865, abolished slavery and involuntary servitude throughout the United States. It was the first amendment to the Constitution directly addressing the issue of slavery and was ratified in the wake of the American Civil War.

The amendment was introduced in Congress in late 1864 as a direct response to the secession of Southern states and the subsequent Civil War, which was fought over the issue of slavery. The amendment was the culmination of a campaign by the antislavery forces, who had been advocating for its passage for several years.

The amendment reads:

"Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction."

By prohibiting slavery and involuntary servitude, except as punishment for a crime, the Thirteenth Amendment established a legal prohibition against these practices and set a foundation for the rights of freed slaves during Reconstruction and beyond.

The amendment was a significant victory for the abolitionist movement and marked a turning point in the struggle against slavery. It was the first step in the long process of achieving equal rights and full citizenship for African Americans.
