Continue

Factorio generation settings allow you to customize aspects of your Factorio world. This includes general world settings and ore generation settings. This allows for new and unique ways to play on your Factorio server! To change the Factorio generation settings, please see the following steps: go to the server control bar and click the Stop button to stop the server. Once your server is completely disabled, click the FTP file access button to log into your server's FTP. In your server's FTP, go to the site of /factorio-experimental/data or /factorio-stable/data. In the data folder, find map-gen-settings.example.json and map-settings.example.json. Select both of these files and then at the top of the webFTP, click rename. When you rename these files, delete .example in the file name. This would make the file names: map-gen-settings.json map-settings.json Once they have been renamed properly, click Save to save these changes. Now that these files have been renamed, you can click to edit the map-gen-settings.json and map-settings.json. In these files, you can change the map settings and map generation settings. Once the changes have been made, click save the file on these files. After changing these files, it's a good idea to reset Factorio's save to create a new save file with new settings. To reset Factorio's save, do the following: make sure your server is still offline on the control panel. Next on the control panel, click the Backup button and back up the server. This will allow you to restore your previous Factorio save at any time. Once the backup has been accepted, go back to the control panel and then click THE FTP file. In the FTP server click folder saves. The folder saves to find the Factorio .zip save file. Your Factorio save file will be called by the same name as your world_name option installed in the Factorio property file (if your world_name option was installed on World, your Factorio save will be called World.zip). Select the Factorio .zip save file and then click delete at the top of your FTP. Then click Yes, delete forever! to confirm the removal of this Factorio save. Once this Factorio save has been removed, click back to the control panel to get out of your server's FTP. Finally, click Start on the control panel. Your server will now go online using the card generation and settings that you have made for your new Saving Factorio! Now you've successfully changed the generation and settings of the Factorio card! If you're having any problems changing your generation settings Please send a ticket to our general support department for further assistance! The Factorio configuration is split between the game server configuration and the starting parameters. The configuration is set using the stats settings to set up the server start-up (stable) branch stableAll other settings are located in Factorio Gaming server config.serverfiles/data/fgtserver.jsonUseful settings include: The name of the game, how it appears in the list of games, description: Description of the game that appears in the list, tags: Game, tags, _comment_max_players: Maximum number of players are allowed to join the server. 0 means unlimited, _max_players: 0, game_password: _comment_autosave_interval: Auto-recording interval in minutes, autosave_interval: 10, _comment_autosave_slots: the server auto-assistance slots, it cycles through when the server autosaves, autosave_slots: 5. If you want your server to be publicly listed on the browser server you will need to enter your profile of the information on the site Factorio. You can use either a marker or a password. _comment_credentials: Your factorio.com credentials. Required for games with public visibility, username: password, _comment_token: Authentication marker. Can be used instead of the password above, token: Determining the parameters of the world generation is a fairly simple task when creating a new world. Steps to make it this way: Delete any existing world dataModify map-gen-settings.jsonUse Factorio performed to create peace with this jsonFollow Guide below for detailed instructions on execution above. First, remove all existing worlds that are in the serverfiles catalog. Не забудьте создать резервную копию сервера serverfilesrm save1.zip rm-r сохрняет в каталоге данных, копировать примеры файлов, а затем настроить их на ваш requirements.cd dataср карта-gen-settings.example.json карта-gen-settings.jsonср карта-settings.example.json карта-settings.jsonIn карта-gen-settings.json, значения генерации руды могут быть: нет - эквивалент 0 очень-низкий, очень маленький, очень бедный - эквивалент 1/2 низкий, маленький, бедный - эквивалент 1/sqrt(2)нормально, средний, обычный - эквивалент 1высокий, большой, хороший - эквивалент sqrt(2)очень-высокий, очень большой, очень хороший - эквивалент 2Once полный вам нужно будет генерировать свой мир. Go back to the serverfiles catalog and run binary.cd ../bin/x64/factorio--create /save1.zip-map-gen-settings data/map-gen-settings.json-map-settings-data/map-settings.jsonI prefer an additional fashion overhaul for the built-in generation. The easiest way that I found to create a world with RSO mods (and add mods in general) is this: Startup Factorio on the customer and install RSO modStart generation of the new world and customize the settings of the generation of fashionGrab mod by the server Delete or rename any previous worlds For generation settings, go to Play's New World's qgt: Mod Settings of the Map and then adjust the settings accordingly. This will create a file called mod-settings.dat that stores these settings. You can find fashion files in your system on the way that saves your Installation Factorio: Windows (file zip): install directorygt;modsWindows: C: Users (AppData)factorio\modsWindows (Steam): C: \t;username\gt;users (AppData) Roaming-factorio\modsOSX: Library/App Support/factorio/modsLinux: qf.factorio/modsTransfer all mod-settings.dat file to your server using the tool, like Filezilla or rsync commands on Mac/Linux, or even a USB drive. Note: DO NOT TRANSFER FILES OVER FTPIf you have SSH open on the server, you want to use SFTP. If you use Filezilla, installing a port to 22 will tell it to use SFTP. If you're using rsync, the team will look like this: rsync -a zlt;source files: You want to give up these files in the serverfiles/mod catalog. You will also need to remove the existing save so that it generates a new one with a new generation of rules. (It's a great time to back up if you have progress that you would like to keep). Go to the root folder of your Factorio installation and then delete save.cd serverfiles/rm-rf save1.zip rm-rf saves / Once you've done that, you're good to start a server. Allows you to change the settings of card and card generation at any time. Please note that card generation changes only apply to new pieces. Watch 63 Star 288 Fork 16 You can't do this at this time. You've signed up with another tab or window. Reboot to update the session. You subscribe to another tab or window. Reboot to update the session. Allows you to change the settings of card and card generation at any time. Factorio is one of those games where you can completely change your experience by pressing a button. All you have to do is change the map settings to experience a completely different game. However, not all map settings are created equal. This leaves players everywhere with a simple question: what are the best map settings in Factorio? The answer, of course, depends on what you are trying to do. That's why we've put together a definitive guide to which settings are best tailored for different players and styles of play. Easy basic defenseWhat are the best card settings for beginners? It's actually a bit of a trick question. I usually recommend tweaking for true beginners, but there are a few map settings that can make things even easier. The best example of this turning off the biters. When you do this, you no longer have to worry about Biter, making it much easier for you to protect your base. To make things easier, you can turn off the pollution and extensions, like a zlt; also good map settings if you want to relax and have the wrong time. If that's your goal, you'll love the next setting. The peaceful exploration we came to the world is the guiding philosophy behind the various Star Trek explorers. As the name implies, a peaceful regime makes it so that enemies don't attack if you approach them. This will help you really pac intelligence and struggle by helping you learn to lie ground as you play. Like most card settings changes, this will disable some of your potential achievements, but will eventually help you play the game on your own terms. Creating MegabaseEventually, each player decides what they want to do Megabase. To make it easier for yourself, there are several map options you can change. For example, you can simplify the collection of resources by activating a very low frequency, very rich and very large deses. You can make things easier on yourself by turning off both Biter and Pollution. With maximum resources and minimal distractions, making Megabase never been easier. Hyper-Specific GoalsEvery Factorio player approaches this game differently. That's why our final section focuses on some of the hyper-specific goals you may have set yourself. For example, someone who wants to aggressively pursue solar energy can switch always day in on position. Someone who wants to invest in landfills (or just live their fancy water world) might want to install water on the Big One. Want to make things easy (but not too easy) at the beginning? Choose a very large starting area to minimize the initial error problem. Honestly, the best way to find the best map settings for your own style of play is to try them all out and see what you like the most! Best Map Settings in Factorio: What's Next? Now you know the best map settings in Factorio, but have you planned your next move? Once you are tired of playing with the settings, it may be time for a new game completely.
