CRAFT BEER BREWERY
FROM BUDAPEST

W E

HORIZONT

Horizont Brewery is a dynamically developing **new-wave craft brewery based in Budapest**. Our beers are on the market since 2014, and we have been an active participant of the Hungarian craft beer revolution ever since. Our brewhouse in the center of Budapest was inaugurated in 2016.

Recently, we were one of the breweries that started up the **„KRAFT” initiative** in August 2016 – our aim is to **differentiate the highest quality craft beers in Hungary**. KRAFT is a philosophy, an ethical guideline and also a quality assurance system. Only outstanding beer manufacturers and brewers of the country could be the members of this club.

Beer has started its revolution all over the world, and demands its place among the highest quality drinks. Our goal is to change the image of beer by creating exciting new beers. We want to put Budapest on the international craft beer map. Our beers are well received internationally: we have participated in a number of international festivals and competitions, and work with European distribution partners.

**We are proud that
our Saison Witbier was
the overall winner of the
Dublin Craft Beer Cup 2017.**

HOPLAGER

In contrast to ales, lagers are bottom-fermented, and are popular for being straightforward and familiar in taste. Dry hopping keeps all these benefits while adding an extra source of fun: aromatic hoppiness. In case of the Horizont Dry-Hopped Lager, American Chinook hops are used in addition to the European variety Styrian Golding that is often found in Pilsner-style beers. This recipe delivers a thoroughly refreshing experience - a true session beer.

Style: Lager

GOLDEN ALE

This style is perfect to get to know top-fermented ales if you have never tried any of them before – or just look for a relaxing, non-demanding beer. Our Golden Ale is a mild brew with subtle maltiness and moderate notes of Columbus and Sovereign hops. While being easy-going and nevertheless delicate, the ale yeast we use differentiates it from a standard lager beer, presenting nuanced fruity esters that are characteristic for top-fermented beers.

Style: Blonde Ale

SAISON WITBIER

Our Saison Witbier combines two styles that are both known as refreshing summer beers. The Witbier style originates in Belgium and typically provides a crisp, spicy, tingly, citrusy sip due to the addition of the coriander and citrus fruit zest. Instead of yeast strains that are normally used in Witbiers, we decided to use a special Belgian Saison yeast, which adds an extra layer of slightly tart, herbal and sophisticated fermentation notes.

Style: Belgian Witbier

of the**

JAPÁN BÚZA

Our Japanese Wheat is based on a truly unique recipe. At first glance, it presents itself as a Bavarian-style Weißbier, with all the citrusy and banana-like flavors that are typical to the style. The surprise comes with the hops: the famous Sorachi Ace, a hop variety with Japanese origin, adds elaborate notes of bubble gum and lime to the equation. The result is an absolutely unusual, but quite addictive and entertaining wheat beer.

Type: German Hefeweizen

AMERICAN PALE ALE

This ale is like a Bauhaus chair: superbly streamlined and endlessly elegant. Our APA is an easy-drinking beer that serves as a lighter choice for those who enjoy hoppy aromas, but don't want to stick with sometimes overwhelming IPAs every time. Being a single hop ale, Horizont American Pale Ale is only brewed with Citra, a sought-after American hop variety that provides a powerful scent of lemongrass and lime, and also a palate-teasing, refreshing citrusy flavor.

Alltech Craft Brews
and Food Fair 2017

INDIA PALE ALE

The Horizont India Pale Ale (or IPA) is not as shockingly bold as you may expect: it is a well-balanced India Pale Ale with articulated hop notes of Cascade and Magnum, but it is far away from those tongue-numbing hop grenades you find elsewhere. In terms of style, this beer is closer to English IPAs; only its aroma is rather on the American side. Although having a decent amount of alcohol, our IPA is very sessionable, offering a delicate balance of aroma, bitterness, body and strength.

Type: India Pale Ale

GENTLE BASTARD IPA

Our second IPA - without doubt the hoppier one. Yet it isn't just about rough bitterness: the 63 IBU worth of Amarillo, Columbus, Simcoe and Mosaic are counterbalanced by a round, biscuity, nutty maltiness - provided by the famous English malt variety, Maris Otter, among other malts used. All those ingredients add up to a delightfully two-sided beer that is rough and elegant at the very same time - a Gentle Bastard.

Type: American India Pale Ale

Silver medal at the Alltech Craft Brews and Food Fair 2017

DÜSSELDORF ALTBIER

Altbier is native to the German city of Düsseldorf, and is a member of the peculiar family of so-called hybrid beers. Brewed with top-fermenting yeast (like ales), but fermented at a low temperature (like lagers), it features malty notes with a dry mouthfeel and an articulated presence of noble hops which were used in the brew. Our Horizont Düsseldorf Altbier is an authentic and fun example of this traditional style.

Type: Altbier

FLAMAND PORTER

With our Flamand Porter, we combined a lot of different beer styles and brewing heritages that will add to the experience while drinking. The base is an English-style porter with strong, coffee-like roastiness, but a couple Belgian elements are also present: Candi sugar is added to bump up the alcohol content without introducing too much heaviness, just like in the world-famous Abbey ales. The Belgian yeast strains we selected ferment it in a matching fashion. Finally, we added citrusy American hops to ensure a complex, harmonic and long-lasting experience.

Type: Porter

VANILLA MILK PORTER

Porter reloaded: slightly lower in alcohol than the Flamand Porter, but with the addition of vanilla beans from Uganda and the milk sugar (lactose), which create a unique complexity, richness and sweetness. This is the ultimate dessert beer - one of our seasonal specialties

The Vanilla Milk Porter is one of our seasonal specialties
