If you are a big fan of K-pop band BTS, then this mobile game is absolutely for you. SuperStar BTS is a rhythm game from DalcomSoft that allows you to play this task while enjoying BTS music. Diehard bts fans should definitely download SuperStar BTS and enjoy the game to the fullest. Like any typical rhythm game, the main goal of SuperStar BTS is to earn a high score and top the leaderboard by filling every music. If you know about games like Guitar Hero or Tap Tap Revenge series, this game works the same way! GameplayThe mechanics are very simple; You choose a song and play it! As soon as the game starts, it tells you a huge library of music containing BTS songs. This is a complete collection of music from the band, from their debut album to the last! Not all songs are instantly available though, as you have to unlock them one track after another. If you love BTS music, I don't see any reason why you shouldn't download SuperStar BTS to your mobile phone. After choosing a song, now you will move on to an actual game that will absolutely put your skills to the great test. Each song has different levels starting from easy to hard. As soon as the real game starts, it tells you to scroll through the note note the standard interface of most rhythm games. The screen will show four scroll bars while the notes start scrolling down, and they all move with the chosen song or rhythm. Every interaction in this game is based on clicking. As the notes go down and hit them respectively spots, players must press the correct button as accurately as possible. Some notes require you to press and hold the button for a certain period of time. Remember that the lack of notes will not only affect your score, but may also end your game. The sensor meter on the top right to the right of the screen indicates your performance. If you missed a lot of notes and emptied the bar, the game ends and you have no choice but to start over. Perfection is KeyIf you download SuperStar BTS, you should know that the game is not just about speed. It's about perfect time and great coordination of eyes and hands. Every time you press a button, there are three possible rankings to achieve; Good, perfect and super (s) Perfect. You'll get good if you press a button in the right perimeter, but not quite in the right place. You'll get Perfect if you click in place, but not as accurately as it needs while S Perfect is what you can get if you hit the right place at the right time. Usually, the game is about perfection! You can get a high score not only by clicking on the button at the perfect time, but also by making a series of combos. If you can make a combo, the right button is constantly pressed. Missing the note will break the combo and you have to start over! Collectible items, missions and leagueOcy the big features of this game are collectible cards. You can get cards by successfully completing the track or through various bonuses. You can also collect them through missions. Missions daily tasks that you can accomplish and earn great rewards in return. Rewards can be in the form of special collectible cards or headphones. Another feature that you can enjoy when downloading SuperStar BTS is the League system. The league is more like an interactive leaderboard where you compete with online players through accumulated points. The higher score you get, the higher the rank you can reach. VerdictWhether you are a big fan of BTS or Kpop music in general or not, you will still find SuperStar BTS entertaining and addictive. The music is great, and the fact that it shows every single from the band's albums makes it a great game for BTS fans. It perfectly combines fun and challenge, giving good play value through its reward and score system.
