Fiber Content: Hardback (View Fabric Guide) Showing 1-30 Start your review of the Marauder Map Guide to Hogwarts (Harry Potter) This is a fantastic book for any Harry Potter fan. Although it contains loads of interesting facts about the movies the real draw in this set is the light up stick and the 4 times out maps containing details from the official Marauder's map. What makes it so amusing is that each of the map pages is full of hidden secrets written in invisible ink that only become clear when the ultraviolet light of the stick shines over the pages. Feel like Harry as you follow steps through the corridors to see who you'll find at the end of the trail and don't forget to search for secret messages and drawings hidden in the artwork. You can even use the invisible ink pen hidden inside the stick to add your own details! There is actually an extra, completely blank, map on the back of the book to create your own design and hide personalized secret messages. There is definitely a lot of fun to be had with this book for children of all ages, even adults LOL. The batteries on the stick seem to hold up pretty well so far, but you can buy replacements too so this is not a product with lifetime and you will be able to come back to it over and over again. One of the four pull out maps in the book Use the stick to find hidden details on the map The stick only highlights small parts of the map at a time so I used a slow shutter speed to take this pic so you can see how you can follow footprints across the map stick The stick can be used as an ultraviolet lens or as a pen with invisible ink... more Oct 05, 2018 Stephanie (Strazybooks) rated that she really liked A fun book about the Harry Potter films (although the information also applies to books). Includes tidbits, trivia, images, and Marauder map pages throughout, which you can read with the special stick/pen included. I liked the way it was organized, such as the presentation of individual courses. It's a good addition to any HP book collection; this book would be a great addition to any Harry Potter collection. It deals exclusively with the Marauder Charter. Who made it, how to use it to find people or places to go. It even comes with its own stick to illuminate places and events on the map. Which doubles as a pen with invisible ink to make your own map, with the map paper included on the back of the book. Jul 29, 2018 Kelsey rated it was amazing I loved this so much! I loved that readers got to experience the features of map Marauders with invisible ink and Harry Potter references were a nice touch! Feb 19, 2019 Kara Sabbagh rated it really liked Honestly a great companion book for really young kids who enjoy movies or who are just getting into the books. Really smart idea and a lot of fun to explore the Map Marauders with the stick. This is a cute little book my mom gave me for Christmas last year. I strangely postponed reading for a few months, knowing that I would probably know everything that was written on it already (which I did; P), but I'm glad I finally decided to give it a chance as I ended up enjoying it more than I thought I would. Thoughts:1. The map aspect of the marauder is so wonderful to look at and extremely functional for a location-based guide like this. Thoughts:1. The map aspect of the marauder is so wonderful to look at and extremely functional for a location-based guide like this. I found the task of using the included invisible ink/pen stick to find all the secret messages and drawings in the various sections of the map to be amazingly fun. I didn't end up writing any of my own messages about others, supposedly, finding it, but it's a smart idea and I know I would have loved this aspect of the book when I was younger.2. The actual information in the book are quite thorough, but also at the point. It was easy for me to read and I didn't feel too painful to go through either – although none of this was new information to me, as I mentioned earlier. I liked how reasonable hogwarts' various locations were going, specifically. The book focuses on the movies, which bugged me a little, but does make for this kind of book, by being a guide and meant for young readers who probably haven't read the full book series yet.3. I really appreciated the graphics in this short guide, especially the way the marauder's map was designed. The stills from the films found on most pages were nice to see, and the accompanying images were surprisingly beautiful as well. It's a well thought out plan, overall, by not being too busy, but still interesting enough to see. ... more Aug 09, 2018 gemsbooknook Gerami Kate Barker rated it was amazing I solemnly swear I'm up to no good. As you make your way through the book and open the times out maps you can use the stick that comes with the book that is not only an awesome stick, but a lens to read hidden messages on the pages. I found so many interesting things I didn't know in this book. I didn't expect him to have that much information. I also didn't expect to have behind the scene information that I didn't know about. After you've absorbed all this wonderful information and gone over the maps with your light stick to find the hidden messages, you can use the other end of the wands, which is an invisible ink marker to write your own messages and create your own map on the blank parchment pages at the back of the book. The Map of Marauder is one of my favorite creations from the Harry Potter Universe, so as soon as I saw this book I knew I had it. I also knew I'd like it. I didn't realize how magical this book was going to be. I honestly don't have a bad word to say about this book and I'm extremely grateful that I now have it for my Harry Potter collection. It's definitely good for a short reading in a day. I love the aspect of interacting with this book, but I wish there was more to do with the light throughout the book not just on the maps. For example, simply by placing fun images and events on information pages. Jun 14, 2019 Martina Krausová rated that it was amazing It's awesome, full of information and facts about the series that we all love, combined with a very funny elements of using a stick, that can shed light and also write invisible and secret messages, I like it, what else would you expect?! :D Oct 20, 2018 Charlotte rated that he liked 3.5 This is a fun book that has details on all things Hogwarts, information about Hogwarts from the movies I found interesting. You can also get a stick that you can use to reveal footprints from The Harry Potter characters on the Marauders Map pages. Musím říci, že Pobertův plánek mě úplně nenadchl. Čekala jsem, že se něco dozvím, ale pokud jste už aspoň jednou viděli filmy, moc nových informací tu na vás nečeká ☹ Grafická stránka se celkem povedla a hůlka s UV světlem a neviditelným inkoustem je skvělá blbost ☺ Jestli tuhle knihu potebujete, posuňte sami. Jan 14, 2020 Suzy Buss rated that she really liked - review of another edition Cet ouvre ravira petits et grands, amoureux de l'univers de la saga Harry Potter.Une idée toute simple: de tencre invisible et une lampe bleue pour la révéler... Il n'en fallait pas plus pour donner vie à l'un des objets mythiques de la saga Harry Potter: la carte du Maraudeur. Et c'est l'enchantement assuré! Cet ouvre nous proposa un retour (parfois grossièrement cv, mais on ne va pas titiller...) sur l'école de sorcellerie Powder et ses alentours via la célèbre Each by This book will delight young and old, amorous of the universe of the Harry Potter saga.A simple idea: invisible ink and a blue lamp for the it didn't take long for one of the mythical objects in the Harry Potter saga to come to life: the map of Marauder. And that's the magic guaranteed! This book offers us a return (sometimes about summed up, but we won't titillate...) to hogwarts school of magic and its surroundings via the famous map. Every part of the castle is mentioned, from the public areas of the four houses to the classrooms, towers, dispensary, greenhouses, hidden rooms and the outdoor environment. And among these descriptive pages illustrated abundantly by the photographs of the films of the epic as well as by the images of Helen Cann, we discover some fins that exhibit parts of the map of Marauder. And here the magic works: with the help of the magic wand provided and a magic formula that we all know, we walk through the corridors of the castle and discover the comings and goings of certain characters, as well as various information. At the sight of the first steps that appear under the light of the stick and disappear after our passage, it is impossible not to fall back to childhood: the result is magical! Preferred in the dark: the result will be even more impressive! Plus: some fun activities allow the book to be adapted thanks to the invisible ink felt hidden in the baguette. A rather short but enchanting book, to offer fans of the epic! ... more Ell rated to be amazing Mar 09, 2020 Dr T Clarke rated to be amazing Mar 03, 2019 Karin Ramirez rated that she really liked May 15, 2020 Andrea rated as being amazing Apr 03, 2020 2020
