Our free downloadable UEFA EURO 2020 Finals Wallchart table is written in Microsoft Excel and has no visual baseline, so you can be sure that you have a free wallchart virus that tracks your team's results and progress in your own time zone. Updates to the free EURO 2020 Wallchart Spreadsheet tournament, which is due to take place on 1 December 2019 after the draw for the Euro 2020 final on 30 November 2019, when the draw will take place on 30 November 2019, our euro 2020 final spreadsheet (.xls and .xlsx) will be updated with all the right teams for group games along with the adjusted match time. After that, you will be able to see the full, accurate and complete list of all the teams and the schedule of matches that will be played in the EURO 2020 tournament. Our history Soccerwallcharts.com since 2014, when we produce FIFA 2014 and 2018 World Cup spreadsheets. Since then we have also published the Rugby World Cup tables of 2015 and 2019 and the Wallchart Euro 2016 Finals table. We pride ourselves on providing good looking, usable and accurate tables without using any visual basic. So you can be sure that there is no chance of any viruses included. As part of Euro 2020, the format will be the same as at Euro 2016. The top two in each of the six final tournament groups will advance to the quarter-finals along with the top four finishers, finishing third. Will the hosts play at home? Each qualified host is guaranteed two home games in the group stage, but there will be no such guarantee for the playoffs. Host countries that are eligible will be automatically placed in the following groups. If both pairs qualify, a toss-up will be held to determine who is at home in their direct meeting. Group A: Italy (Olympic In Rome), Azerbaijan (Olympic Stadium, Baku) Group B: Russia (St Petersburg Stadium), Denmark (Parken Stadium, Copenhagen) Group C: Netherlands (Johan Crujff Arena, Amsterdam), Romania (National Arena, Bucharest) Group D: England (Wembley Stadium, London), Scotland (Hampden Park, Glasgow) Group E: Spain (San Mames Stadium, Bilbao) Why EURO for Europe? ©Getty Images There is great pleasure in bringing EURO 2020 to many countries and cities to see football acts as a bridge between nations, and to bring competition closer to the fans who are an integral vital force of the game, says UEFA President Alexander Seferin. Click on the images to see more. Thank you so much for visiting. My goal is to make you awesome in Excel and Power BI. I do this by sharing videos, tips, examples and downloads on this site. There are over 1000 pages with all things Excel, Power BI, dashboard and VBA here. Go ahead and spend a few minutes to be AWESOME. Read my story - FREE Excel tips book By the time I released these templates, the 2018 FIFA World Cup tournament has four group matches left. Twelve teams have already reached the quarter-finals from Group A to F. I, the previous World Cup champion... This table is based on the Last Man Standing table. I just simplified it to match this tournament. The idea is similar. You can't choose a similar team twice. There are two models that you can choose... These World Cup team stats and head-to-head entries and match tracker tables may be the ones you need to accompany you to watch this year's World Cup, which will be held in Russia. First table... It's just a passive World Cup Tournament Schedule that doesn't have an automatic score calculation. It has a poster or A3 size that is suitable for printing and putting on the wall. But, instead of just ... This is just an extended version of my personal Biorhythm calculator that I published two years ago. I modify the calculator so that it can be used to calculate any Biorhythm footballers who are involved... The Office Pool World Cup is a spreadsheet to play prediction or comparison games with many of your friends and relatives. This table allows you to compare the prediction score between you and your friends... The World Cup schedule and scorecard is an Excel table to track your schedule and record the actual results you may have been waiting for. Since 2008 I have committed to creating and providing free fixtures and scores for football and leagues. Beginning with a simple Euro 2008 and then continued with the 2010 World Cup, these score sheets were expanded to have more beautiful features to accompany people tracking their favorite teams during time global football events. Thanks to Microsoft, too, as they have added more features and features to make creating this table easier. What about the World Cup itself, since 1998 there are not many changes in the number of teams and regulations, for the first time FIFA allowed 32 teams to participate in the tournament. Although, it could be changed by 2026, where 48 teams can compete in the 23rd World Cup.Template ContentsThis template package includes three files: World Cup Schedule and Scoresheet No Flag FunctionsWorld Cup Schedule and ScoresheetWorld Cup Scoresheet Top ScorerHow to use TemplateThis World Cup Schedule and scoresheet my third World Cup table. Compare with the previous two tables, I've added a few features to help you personalize this table. Also to match more on the official group tiebreak regulation. To start using this template, you can go to the top of this sheet to set your language and time zone. And if you can't find one, you can personalize it yourself from a user's table. You can customize this table by setting it tongue to meet your own language and time zone to match your own time. I use Google's translator tool to translate English terms into a specific language. This translator tool may not translate these words/terms correctly, so you can reprint the wrong translation to the correct one. Changing the LanguageSelect language that you want to fix in the C7Type cell is a new translation for the terms you want to correct in the E column. Just terms that you want to change. Go to the tournament list and select MY LANGUAGE to change all the terms and conditions into a new translation language. Changing the time of the matchType of your city time difference with Moscow in the E4 cell. If your time is ahead of Moscow, you can put a K sign in the D4 cell. If your time lags behind Moscow, you can put a sign - in the D4 cell. Go to the standings and select MY CITY to adjust the match time with your local time. In addition to these two options, you can also highlight specific group matches, team names and venues by selecting them from the corresponding dropout list above the points sheet table. Once you've personalized this standings, you can start putting actual results in the corresponding boxes. You can play with points to see the rating movement of each country in their groups. Group modelling based on FIFA regulations, the actual ranking of the teams in each group is determined as follows (Article 32.5 rules) :p onts received in all group matches; Goal difference in all group matches; number of goals scored All group matches; Points received in group matches between interested teams; Goal difference in group matches between interested teams; Teams red card (second yellow card): minus 3 points; straight red card: minus 4 points; yellow card and straight red card: minus 5 points);d lote draw by the FIFA Organizing Committee.I have modeled how each team will rank through the tie-break regulation above in their groups in this World Cup Schedule and Scoresheet.In Group A, each team has different points. Their rating will be determined without problems based on the rule No. 1. It also applies to Group B. In Group C, the top two teams have similar points. But, France will be put first because they have a better goal difference than Denmark (rule No.2). In Group D Argentina is on top because they have never lost. The other three teams share similar points. Since Nigeria and Iceland have a better goal difference than Croatia, Croatia is excluded. Both Nigeria and Iceland have similar goal difference and goals scored. And there is no winner in their match. This means that their rating will be decided on fair play points (rule No. 7), as the application of the 1-6 rule does not give a clear winner. Place fair play points next to the appropriate team in the custom Language sheet. You can go to the FIFA website to get value if it goes to this situation. I put -10 for Nigeria and -12 for Iceland to simulate the situation. Since Nigeria has higher fair play points (-10 against -12), then Nigeria is qualified and Iceland is excluded. This is the case in Group E, where Brazil shares similar data with Costa Rica. Brazil are through because they have the best fair play points (-10 vs.-11). You can see it applied in the second image above. In Group F, South Korea is at the top of Sweden because South Korea defeated Sweden. Despite the fact that their group statistics are similar, South Korea has the right to reach the playoffs (stopped under rule 4). In Group G, the winner and runner-up is determined by the no 2.In of Group H, all teams have similar points. The goal difference gave Poland the winner of Group H and Senegal eliminated. Rule No.4 conceded to Colombia to qualify as they defeated Japan in their match. In 2018, Group H has released Japan and Senegal as two teams with similar records, where their ranks must be decided by rule No. 7. How do I apply it? Go to the custom language sheet and put -4 in Japan string and -6 in Senegal string. He will change position and put Japan above Senegal. You can see an example of how usually No. 7 is implemented in the second screenshot above. What about if, after rule No.7, the teams are still tied? FIFA must launch Rule 8. Since it is based on the picture, you need to enter directly inside the group standing table to get it to follow the result Knock Out Stages SimulationThere are a formula that will automatically place group winners and second place in the respective brackets. There are conditional formatting formulas that will show the background background based on their respective groups. As you can see in the group standing table, the group has a yellow color where you can see it shown as a background color for Russia and Uruguay in brackets. This color will follow them if they defeat their opponents and advance to the next round. In this knock out stages, you just need to enter the actual full time score (normal and extra time) in light green boxes next to team names. If full-time scores draw, then the pink color boxes will be shown where you can fill it with a penalty shoot out result. The team that wins the match will automatically advance to the next round. Their flags and background color markers will follow accordingly. We will see the results of the assessment until the final completion of this table. Watch the YouTube video below to understand more about how to use this World Cup Schedule and Scoresheet.I has created only two World Cup Schedules and Scoresheet models. One with formulas to show the flags of the country automatically and one without it. You can use the second one if you have a slow processing problem while your Excel handles input points. These spreadsheets are free to use. But remember that the license is only for use within your own business. You cannot distribute or resell it to other parties. World Cup score sheets with goal scorers inputYou may want to track goal scorers in the World Cup. If so, you can use this table. He has the ability to scorer a goal tracker. I use my previous World Cup table since I prioritize modification for other tables. I just changed the names of the teams and their lineups. Squad names have not been officially announced, you need to update it with official after they are available. I'll update it as well. This table has a different format than others to accommodate scorers. To use it, you must enter actual scores for any completed matches. You will see the goal scorer drop a list of color markers. You can choose the player's name from this dropout list. If there are own goals, you can choose a player with (og) bracket for their names to exclude their goals in the list of top scorers calculation. You can see the final group tournament at the bottom of the sheet. And there is a temporary list of top scorers on the right side where you can see the names in the list of top scorers. You can then continue scoring and selecting scorers for all matches in the Knock Out Stages sheet. There are 3 account boxes you need to fill, normal time (NT), extra time (ET) and penalty (PK) boxes. You'll see similar background colored cells with a dropout list. The number of boxes filled follows the bills in NT and ET boxes. You don't need to print for PK points, as the top scorer calculation does not exclude him in the list of top scorers. But, you still need to enter a PK score to decide the respective match winner who will advance to the next round. You can see the final list of top scorers on the top of the Knock Out Stages sheet. If there are several players who have similar goals, the table rank reorder will be shown to allow you to reorder their rank based on the correct FIFA order. FIFA regulate that there are other parameters, it helps them and their game minutes to break similar goal ties. Since I don't want to add more complexity to the formula, I made it easy by adding a reorder table to rank them manually. Watch this YouTube video to learn how to use the World Cup Scoresheet with Topscorer. Topcore.
