Download

I've tried updating everything to the latest versions of everything, even reinstalled the programs. A: Not a bug: try to reinstall the SDL2.dll file add the folder %AppData%\Video games\Steam\steamapps\common\NeverWinter\Bartlantis\bin\Debug to your system path try to execute the program with administrative privileges Q: Debugging an if-else loop I'm having a hard time understanding why the for-loop inside of the if-else statement isn't looping. I'm used to running some code, and the output of the program is in the console, but in this scenario I'm running the program and I don't get any output from the console. Code is below: #include using namespace std; int main() { int counter = 1; for(int i = 1; i 0) { cout 520fdb1ae7
