Morton Apr 21, 2556 BE n As things stand, we have to wait for that update to be available for free download.Successfully conducted C6/7 Anterior Cervical Discectomy and Fusion (ACDF) Using a Neuromonitor. A 69-year-old man was transferred to our hospital after experiencing acute cervical spondylotic myelopathy (CSM). An anterior cervical discectomy and fusion (ACDF) was performed on his C6/7 vertebrae by a right-handed surgeon (He) who is a left-handed resident. A neuromonitor was used and surgery was conducted successfully.Today, we would like to announce that the Burmese version of Bitcoin Miner, BTC Miner, is now available. This is a 1.0 release from our team, with further development to come in the near future. For more than a year, our team of Burmese developers have worked tirelessly on this new version of BTC Miner. Today's release, 1.0, marks the first time that the Bitcoin Miner app has been released in Burmese, the official language of Myanmar. BTC Miner uses the latest Open Bitcoin Protocol (OBP) specifications and is completely free to download and use. An older version of BTC Miner (0.2) was released as a test of the Burmese language. That version was the first BTC Miner app to hit the market. BTC Miner 1.0 includes all features from the 0.2 version. BTC Miner 1.0 is a complete rewrite with a new user interface, help screens, and re-architected code. BTC Miner uses the latest Bitcoin protocol specifications, including the new BIP70 improvement. BTC Miner 1.0 is fully compatible with 0.2 BTC Miner and will not conflict with either version. This project is spearheaded by our Burmese developer team: the BTCMiners and the Burmese Bitcoin community. As such, we would like to give them the praise and credit they deserve. The version of BTC Miner they created is a great achievement. It provides a small window into the very real digital currency economy that is growing in Myanmar and the surrounding region. We would like to thank the team for their hard work and dedication. BTC Miner 1.0 was created by our team in Burmese. It is 100% free and supports the original Bitcoin protocol.
