The full list of Mercury MerCruiser engines covered by this guide is below: Mercury MerCruiser offers a wide range of petrol engines with angular tilt speakers (Sterndrives) and reverse gearboxes (Inboards) with high performance from 135 to 425 hp. All carb engines are equipped with an exclusive TKS launch system for convenience. You don't need to suction, no swap, no pre-filling fuel. Just turn the key in the ignition and the engine is running. All multi-point fuel injection (MPI) engines are equipped with an ECM 555 electronic control unit developed by Motorola. Multi-come fuel injection engines are equipped with a SmartCraft measurement and control system that provides control operating conditions and on-board equipment of the vessel. MerCruiser together with Cummins manufactures diesel engines under the Cummins MerCruiser Diesel (CMD) brand. Diesel engines can also be used with tails (Sterndrives) as well as in tails (Inboards). The company produces the widest range of sloping speakers in the industry, with models designed for all types of boats, from sports to pleasure and racing. Whether it's the reliable Alpha and Bravo dynamics with smooth, silent gear change, Bravo X's long-term speakers are designed and manufactured in the process of tireless and responsible work to ensure high performance and long-term engine life. Using cutting-edge technologies that exceed all expectations for reliability and performance, Mercury MerCruiser's stationary engines have every chance in the future to maintain a leadership in the field of power plants for water equipment.
