

CAREER OPPORTUNITIES IN PHARMACY

| | |
|------------------------------|----------------------------------|
| Room: | Jan Willem Schaapfoyer |
| Time: | Monday 15:00 to 16:30 |
| Chair(s): | Huub Scholing |
| Organizing FIGON partner(s): | Young Innovators Medicine |

The Young Innovators of Medicine (YIM) is the young professional branch of the Association of Innovative Medicine (VIG). Providing interactive presentations for students is just one of the activities YIM supports for young professionals interested in working in the pharmaceutical industry. During this presentation we aim to provide a comprehensive overview of the career opportunities within the innovative pharmaceutical industry in The Netherlands. Various organizational sections and job profiles will be explained and we aim to highlight the required skills, career opportunities and ways to start your career within this broad innovative sector. By taking the time to answer all of your questions we create an interactive session in which you gain a general overview of what it is to work within one of the innovative pharmaceutical companies in The Netherlands.

The second part of this presentation will be given by Dr. Jeroen van Smeden, Director of Education at CHDR. The presentation will elaborate on the practical implementation of the aspects that were mentioned in the YIM presentation, from the point of view of a 'clinical pharmacologist'. In addition, he will tell more about the work at CHDR and the contact from this perspective with different authorities, such as the MEB and the CCMO.
