The screenshot shows the Anaconda website's macOS download page. At the top, the Anaconda logo is on the left, and navigation links (What is Anaconda?, Products, Support, Community, Resources, About) and a green 'Download' button are on the right. Below this is a three-column header: 'High-Performance Distribution' (Easily install 1,000+ [data science packages](#)), 'Package Management' (Manage packages, dependencies and environments with [conda](#)), and 'Portal to Data Science' (Uncover insights in your data and create interactive visualizations). A row of OS icons (Windows, macOS, Linux) follows. The main section is titled 'Anaconda 5.1 For macOS Installer'. It contains two boxes: 'A Python 3.6 version *' and 'B Python 2.7 version *'. Each box has a green 'Download' button. Below the buttons, the file names are listed: '64-Bit Graphical Installer (595 MB)' and '64-Bit Command-Line Installer (511 MB)' for Python 3.6, and '64-Bit Graphical Installer (588 MB)' and '64-Bit Command-Line Installer (506 MB)' for Python 2.7. The '64-Bit Graphical Installer' links are highlighted with red boxes. At the bottom, there are links for 'How to get Python 3.5 or other Python versions' and 'How to install ANACONDA'.
