Why Do We Laugh?

Everyone loves to laugh. It is something everyone in the world has in common. We giggle, chuckle, or burst into laughter when someone tells a joke or when we feel ticklish. So, what makes us laugh? Experts believe that laughing is used to make our relationships stronger with others. In ancient times people used laughing as a form of communication. They would laugh to let others know everything was ok and that there wasn't any danger.

Why Do We Laugh?

Another reason we laugh is to feel relieved and relaxed. Laughter helps us cope with stressful situations effectively by releasing special feel-good chemicals called endorphins, which also relieve pain. Not only that, but laughter is also a form of exercise. The act of laughing involves multiple body parts that make you breathe deeply, use your muscles, boost your immune system, and get your heart and lungs to function better.

Why Do We Laugh?

Laughing can calm you down when you are upset. It can ease pain when you are hurt. Laughing can also put you in a good mood when you are feeling anxious or fearful.

We can use laughter to bring people closer together, put an end to a possible conflict between people, and as a tool to keep us healthy. This is why people say "laughter is the best medicine." Laughter is contagious also. When one person starts laughing, others will usually begin to join it.

Neither/Neither of

We use **neither** when talking about two people or things in the negative;
not either

We use **neither of** when using a determiner (e.g. those, the, her, his) + plural noun, or before a object pronoun.

Neither boy was happy.

Neither of the meals sounded good.
