Inkscape is a vector graphics editor that also works as a layout tool. It supports drawing, text, shapes, and filters, and can convert vector graphics to formats such as HTML, PDF, SVG, or PostScript. I think that I might put this on the front page of the software news section as it is a very nice piece of software and would be a very big help to the world's graphics. I've been using Inkscape for some years, and a really good and useful piece of software. Thanks! I'm just wondering whether the 100,000 keys were given for Inkscape 2.48? If so, then I think the wording of the announcement is misleading. The main download page says Inkscape 2.48 has just been released. The only mention of a license key is buried on a page called "Instructions for people with previous versions of Inkscape". My sister asked me for some help with Inkscape. She wanted an ellipse in a circle, but when she was doing this, she found that it wasn't a circle, but a diamond.

I'll send her a screenshot if I find it, but I want to know if there is a way to change the circle to an ellipse. Thanks! I was really impressed with the new update. Inkscape is now my favorite vector tool. I have a question about the `OnClickCreateRectangle()` function. It's an example of how to draw a rounded rectangle. But when I use `OnClickCreateRectangle()` my output is a diamond shape instead of a rounded rectangle. Is there a way to fix this? Inkscape has been my favorite tool for years. So when I saw a new version, I couldn't wait to try it. This new release is an excellent update, both visually and functionally. I was particularly excited to be able to use the new vector text tool. I'm just wondering whether the 100,000 keys were given for Inkscape 2.48? If so, then I 520fdb1ae7
