This is a high-end software for all the professional softwater artists. Manufacturer SoftWaters, Inc. Description Version 18.5.351 This is an annual user support release, providing maintenance, bug fixes and enhancements for SoftWaters products. Also, we release a brand-new product or service that requires additional developer time to create. For the new release, we provide a brand new customer download site where customers can upgrade their account to the new version. Some of the significant new features of 18.5.351 include:. A new Mixed Volume Rendering engine (MVRE), The old version of the MVRE was fast and it had problems when rendering multiple structures for many materials. The new MVRE is faster and it works perfectly.. Structures can now be embedded in scenes.. The character editor for the 2D animation pipeline, adding basic human joints to the human characters, loading and saving skeleton animation, adding 2D image layers to the 3D animation pipeline and more.. SoftWaters 1st and 2nd person cameras.. SoftWaters product developer network with the new idea of build. If a developer has a software need, they can post their idea on the SoftWaters development network and then other SoftWaters developers can reply to their idea and develop it.. Also, the new idea of build, allowing SoftWaters users to buy a fraction of the cost of other 3D software, and SoftWaters developers to earn a full time income to develop SoftWaters software.. New virtual studio sound engine. Sound is very important to making a 3D film and TV show. This sound engine has much more features than the old one, plus it is much faster. In addition, SoftWaters now provides free virtual studio sound engine for non-commercial use. The accompanying 2D pipeline, also known as Silhouette 2.0, adds the ability to import Silhouette 2 files as 2D image layers in 3D. So, now a Silhouette 2 file can be easily imported to be used in 3D for visual editing, or for 3D image editing or painting. The 3D animation pipeline and Silhouette 2 pipeline are very powerful together, allowing the artist to make a cool 3D animation in minutes or hours. Also, in the 3D animation pipeline, there are many new filters for finishing a 3D character in 3D or in 2D.. The new Mixed Volume Rend 520fdb1ae7
