.zip.The Great Game of Genocide The Great Game of Genocide: Imperialism and the Final Solution is a book by Joseph E. Schwartz and Steven Rose. It won the 2011 Lionel Gelber Prize for "the most significant contribution to the study of the Holocaust in the past year." The book is a history of the Holocaust, focusing on the European empires that carried out the extermination. Summary The authors describe the evolution of the Nazi genocide within the context of European empires, beginning with the Ottoman Empire, when Berlin used its support for Turkey in World War I to save the empire from defeat, though it backed Britain and France to defeat the Central Powers. The book then traces the development of the genocide from colonial genocide to the Final Solution. The book says that the genocide was the culmination of a series of policies aimed at domination of Europe by force. It begins with the decline of the Ottoman Empire and the rise of the Russian Empire, the first of two empires whose bloodiest chapters were in the Balkans, and whose brutalization of the Bulgarian population was a central aspect of the Holocaust.
