More Class 2 Teachers Guide will be downloaded soon. You can always visit this page to check for newly downloaded files. Thank you. The generation, born after 1994 until 2004, is called Generation. This is the first generation to give birth with full technology. They were born with PCs, mobile phones, gaming devices, MP3 players and the ubiquitous Internet. They don't know life without technology. Thus, they are often referred to as digital natives and are very comfortable with technology. They can email, text and use computers without any problems. In addition, members of the generation can understand and master advances in technology. Unfortunately, this dependence on technology and gadgets has a negative impact on members. They would rather stay indoors and use their electronics than play outdoors and be active. They lead a sedentary lifestyle, which can lead to health problems at the end. For them, social media platforms are a way to communicate with the outside world. They are not worried about privacy and are willing to share intimate details about themselves with complete strangers. They have virtual friends, and for them to hang out with friends means talking to them on cell phones, emails and text messages. However, at the same time, this generation is considered creative and collaborative and will have a significant impact on how companies operate when they join the workforce. Members of The Generation th are good at multi-back. They can text, read, watch, talk and even eat at the same time. However, it has also led to a decrease in attention span, leading to what psychologists call acquired attention deficit disorder. This generation is unable to analyze complex data and information because they cannot focus for very long. While we don't know much about Gen and yet... we know a lot about the environment in which they grow. This highly diverse environment will make the next generation primary schools the most diverse in history. Higher levels of technology will make significant inroads in academics allowing for customized instruction, analysis of student history data to allow diagnosis and remediation or accelerating achievement opportunities. Gen and kids will grow up with a very sophisticated media environment and computers and will be more Internet savvy and expert than their Gen Y predecessors. DepEd Tambayan is committed to providing free resources for our fellow teachers. Let these downloadable resources help you and reduce your time in documents, so that your efforts can be directed to the actual learning process. Mabuhai ang mg guro! What is a K to 12 teacher guide? The purpose of the K to 12 Teachers Guide is to help teachers prepare units of work that integrate listening, speaking, reading, writing, and learning. The Teacher's Guide helps teachers think about the important goals of the curriculum and the opportunities children need to succeed in achieving their goals. The K-12 Teacher Guide helps teachers expand the range of teaching methods. It also encourages teachers to think about the best conditions for literacy. The K-12 (TG) Teachers' Guide and Students' Material (LM) are resources used to prepare daily lessons. Additional resources include materials from the Learning Management and Development System (LRMDS) portal, tutorials and other additional materials, whether digital, multimedia or online, including training. However, these materials should be used by teachers as resources and not as a curriculum. Evaluation is a continuous, planned process using different forms of tasks to identify, collect and interpret student performance information. It involves processes to generate and gather evidence of achievement, evaluate this evidence, record results and use this information to understand and assist in the development of the learner in order to improve the learning and teaching process. The assessment should be both informal (assessment for learning) and formal (assessment of training). In both cases, students should be provided with regular feedback to improve the quality of their education. Download these Teachers Guide (TG) 2019 - 2020 files for free. No Adfly. No pop-up messages. The virus is free. Safer. Faster. The Limited Time is 50% OFF on all training packages of the Updated DepEd Training Manual (CG) for Class 1-12 for SY 2018-2019 Now (2019-2020) Knowing what to teach and when is a common source of anxiety among aspiring teachers. Many states, districts and schools help teachers walk their lessons with instruction. Although sometimes rigorous, these tools can make teaching more focused. Teachers do not go to class without knowing what to teach and when to teach it. If education worked this way, it would be chaotic! Instead, states, districts and individual schools help determine what materials cover teachers by creating a learning guide, a guide that outlines the material teachers should cover. While teaching manuals can range from very specific to general outlines, teachers from preschool to the professional world use them to guide when planning. Depending on the training curriculum guidance can be subject and/or class. For example, primary school may have math, science, social research, research, and science programs, language arts for every class level from kindergarten to. Each subject in the manual sets out the goals or standards that students must meet by the end of the due date, usually the school year. Some guides are specific, providing detailed information on what should be taught and when, as well as what the instruction should look like. For example, a math curriculum manual might bring teachers to teach fractions in November, and then further break the content into day-to-day instructions on numerator and denominators. This may even provide steps for teacher training and possible tasks for practice and evaluation.
