

WADE M. AUBRY, MD

Wade M. Aubry, MD is an internist and endocrinologist in San Francisco and a Senior Advisor for the Health Technology Center (<http://www.healthtech.org>), where his work involves forecasting the impact of emerging technologies on the health care system.

He is also Chief of Staff of Saint Francis Memorial Hospital in San Francisco, Associate Director of the Center for Medical Technology Policy (<http://www.cmtpnet.org>) at HealthTech, and Associate Clinical Professor of

Medicine at the UCSF Institute for Health Policy Studies, where his research focuses on technology assessment, coverage decisions, and health insurance mandates.

Dr. Aubry has extensive experience with the Blue Cross Blue Shield system and Medicare and is currently Senior Medical Advisor to the Blue Shield of California Foundation's California Technology Assessment Forum, a public process of technology assessment using evidence-based criteria.

Previously, he was Vice President of the Lewin Group, a health care consulting firm, Senior Vice President and Chief Medical Officer for Blue Shield of California, Medicare Part B Medical Director for Northern California, and National Medical Consultant for the Blue Cross Blue Shield Association, where he chaired its Technology Evaluation Center's national technology assessment panel for 6 years and represented the BCBS system in a variety of national roles related to technology assessment, clinical research, and health care quality.

Dr. Aubry received his BS degree Phi Beta Kappa from Stanford University, his M.D. degree from the UCLA School of Medicine, and his postgraduate training from Cedars-Sinai Medical Center.

He has served on numerous national committees and health care advisory groups, including the CMS Medicare Coverage Advisory Committee, the American College of Radiology Imaging Network (ACRIN) Advisory Panel, the National Committee for Quality Assurance (NCQA) Geriatrics Measurement Advisory Panel, and the Delta Dental of Minnesota National Advisory Council on Oral and Medical Health.

He has authored many articles on medical technology and managed care and is co-author of a comprehensive case study on bone marrow transplants for breast cancer which was published in January 2007 by Oxford University Press entitled *False Hope: Bone Marrow Transplantation for Breast Cancer*.
