MEDICAL AND LIFE SCIENCE LOGISTICS SOLUTIONS

Specializing exclusively in medical and life science transportation has allowed us to zero in on the very specific needs of our clients.

Our 24/7/365 dispatch center is manned with knowledgeable team members who are equipped to handle even the most in depth SOP's. Our driving force and dispatch teams are experts in hospital, laboratory, physician's office, and specialty site protocols.

As a Medical only delivery service, we take our responsibility of providing reliable service each and every time seriously.

Communication is key when delivering precious cargo with tight time constraints.

We continue to integrate the most current technology to ensure our clients communication standards are met. This includes but not limited to online tracking, electronic communication, and of course good old fashion telephone confirmation. We have a 4-step confirmation process that will assure correct processing.

To discuss partnering with Medlab Logistics please use our contact information below or use the chat feature on our website.
