

SEPT 18th– SEPT 21st

DIVER BOTTOM BARRIER LOCATIONS: Sites 14, 5, and 10

See Map Attached

BOTTOM BARRIER REMOVAL: The TKPOA has contracted with Hiuga Dive Company to implement two of the Group B methods – Bottom Barriers (BB) and Diver Assisted Suction Harvesting (DASH). Divers will be removing the Bottom Barriers next week, Sept. 18th through 21st, in Sites 14, 5, and 10. If the divers are planned to be in or around your dock, you will receive a door hanger at your home with more details the week prior.

CMT YEAR 3 OCTOBER VOTE: The WQ team has the vote package ready for the upcoming 2024 Waterways Projects Special Assessment. The ballot will be sent out late September and votes will be counted at the November Board Meeting. We highly recommend visiting [keysweedsmanagement.org](https://www.keysweedsmanagement.org) and reading documents on the “CMT Year 3” page. This page provides information on how Year 2 is going and includes plans for future years as we start looking ahead to long-term and large-scale planning. It includes summarized preliminary results from CMT lead scientist, Dr. Lars Anderson, budget breakdowns and waterways expenses, TRPA and the League’s financial contributions, video of our most recent Town Hall Forum and more! We will continuously update this page with more information to best inform you for this upcoming vote.

Please contact the TKPOA WQ department for additional information or to answer any questions about work being done on your waterways.
