## Ant video er for firefox 55

Hello, I have the UBUNTU 18.04 LTS. I tried yesterday to read videos on Firefox, (no matter the player, a little all in fact) but it does not work. I tried to find a 'on the net but they all date from old ubuntu and suddenly ... theirs -- it's appropriate to be a..... I'm when 'pretty new on ubuntu know the ^^J found this order on the internet, it installed a bunch of stuff but tjr no way to read the video in flash or other:sudo apt ubuntu-restricted-extrassi you have solutions I'm ready... Thank you guys:-) Thank you for using the tags here. by cqt493 (10/06/2019, No 15:50) nam1962 Give us:cat /etc/apt/sources.list is /etc/apt/sources.list.d -IAnd an example of a video that you can't read. Here's the return: elderat@Monordi: /etc/apt/sources.list #deb cdrom: Ubuntu 18.04.2 LTS -Bionic Beaver - amd64 (20190210)/s (url=help.ubuntu.com/community/UpgradeNotes/url) deb 'url' -deb-src 'url' -N.B. It's not going to be a problem. It's not going to be enough. deb 'url' -deb-src (url- /url- N.B. It's not going to be enough. It's not going to be the last time you like to be. Ubuntu. deb 'url' -deb-src (url- /url- -updates -deb-src (url- /url- bionic-updates universe - N.B. UNSUPPORTED - Ubuntu. It's not going to be enough. Пожалуйста, удовлетворайте себя в том, что касается ваших прав на использование программного обеспечения. It's not going to be enough. It's not going to be the last time you like to be. Ubuntu. deb 'url' (url- /url- from 'url- bionic -deb-src (url- /url- bionic-updates multiverse N.B. " may not have been tested the way it is contained in the main release, although it includes new versions of some apps that can provide useful features. ## ## Please note that the software in the backports will NOT receive any reviews or updates from the Ubuntu security team. deb 'url' 'url' bionic-backports the main limited universe universe -deb-src (url- /url) bionic-backports of the main limited universe universe - Uncomment the following two lines, to add software from This software is not part of Ubuntu, but is offered by Canonical and the relevant vendors as a service to Ubuntu users. deb 'url- bionic partner -deb-src (url- bionic partner deb 'url- security basic limited -deb-src (url- bionic security main limited deb (url- /url-bionic-security-universe-src (url- bionic security universe deb s url- src security.ubuntu.com/ubuntu/url-bionic-security-multiverse-elderat@Monordi:\$ls/etc/apt/sources.list.d -1 For example The Fall of the Black Falcon ^^:ration: please, use code tags (explanations here). ..... Last change cqt493 (10/06/2019, at 15:49) nam1962 Oki, can you read and apply this procedure? Procedure? platform you point out (which I'm not sure about the legality) it doesn't work for me either. When you go to these types of sites, you definitely have to add to your Firefox: ublock origin. Okay, (yes, I like that for all my movies, on the windows they work (obviously)), how to add ublock origin? Hi mailbox, you can install an extension of Firefox: Ant. When you can't stream, you can download the video you're interested in. A- Last change in the mailbox (10/06/2019, at 16:04) Problem solved? Enter it by changing the name of the item. Linux user 449594 nam1962 ublock - ... ck-origin/You can still use a chameleon to make you look like WSI see that when I activate the chameleon and make me look like a Chrome under WS8.1 it goes on and asks me to open an account (which I will never do on such a site...) It's ok for you to block and for an ant, thank you;-)Chameleon lets you pass yourself on Chrome on Firefox and that's it? Do you know if it allows you to watch streaming video in general? nam1962 Chameleon does not allow anything software, it masks you and suddenly a site that does not want to serve on Linux believes that you windows ca c is the top it is active only after downloading? it acted 'a bit like a vpn (or proxy...)?????? not against jsuis is a fan of all that data protection and privacy, I see that all this should allow them private navigation, etc etc... Doesn't he send magazines or something? Incoming No, extensions like Chameleon, change the technical data of your browser (user agent) to make it look like a remote server that you use the operating system other than yours. Solved problem? Enter it by changing the name of the item. Linux user 449594 nam1962 Trigger12 wrote :(...) jsuis is quite a fan of all that data protection and privacy...) Then you'll like this streetmoderate: no auto-pub, thanks to -optimize-firefox/tuto/url In the same place you'll find one about email security. Last edited by nam1962 (The 10/06/2019, at 16:22) nam1962 wrote:Trigger12 wrote :(...) jsuis is quite a fan of all that data protection and privacy...) Then you'll like this streetmoderate: no auto-pub, thanks to -optimize-firefox/tuto/url In the same place you'll find one about email security. In messaging I use protonmail, but I found that their encryption method is not so reliable that it ... ^^ I use GnuPG to communicate if necessary, and check in 2FAJe believe that read that Thunderbird is not bad and in messaging think tails as well, but that I am not sure that I need it for tuto;-) Is it an adblock? Did it work the same way? nam1962 Ublock and urlmoderate: no auto-pub, thanks to -ublock-origin-is-much-more-leger-than-adblock/lighter and more ethical /url than Adblock, on the other hand, now streaming pages of the type 'dp stream' or 'filmcomplet' and others do not even open anymore... Is that going to be a block? Why don't we lock it up first? :-/ nam1962 Ublock only blocks scripts (mostly malicious) in principle. Is it a sweat someone will tell me how to confirm at the terminal when we have it? G Help O Write W Search K CutJ Justly C Pos. cur.-X Leave R Read fct. Replace U Coler T Orthograp.- Go ligJe want to change server name I would like to include a photo here, but I failed-/thank you! yano1966 Ublock doesn't bother streaming sites at all if it blocks what there are crooked scripts hidden on the page (as is often streamed), your first link doesn't work at home either while I can watch without worrying about the streaming platform that I use. Important: Be sure to refer your topics to Allowed when they are, at the beginning of the title by clicking Edit under the first message, and a brief summary of the decision at the end of it. Thank you. Xubuntu 18.04.1 LTS - Lenovo T410 -Toshiba Satellite A300 Linux-Azur member thanks to you;-)I will put out another site can you tell me if it works from home? ^^xubu1957, it's good to confirm the change nameserver, I perform what you said to do, I get to this: again, I just want to confirm a small change to the numbers I find myself lost ^^ I do not see at all what format DOS format MAC or even added (at the end) or added (at the beginning) .... And why there is a name file to write - at the beginning or end of what. ^^mthank you for the method of inserting images IPS: well, it's not quite what I wanted for the image, but it's already about (I just saw the final rendering . . . The latest version of Trigger12 (12/06/2019, at 10:20) xubu1957 Do you want to access the file? Try: Important: Think about switching your items to Allowed when they are, in edit under the first post, and a brief summary of the decision at the end of it. Thanks.Xubuntu 18.04.1 LTS - Lenovo T410 -Toshiba Satellite A300 Linux-Azur member? qq knows? thanks;-/oooops I didn't see your post really no, I have to change my server name that I faitJe just want to check out this action, I was guided by the function ctrl x leave and then I confirm, but now I block on the screen, which I did and I pome ... I don't understand the suggestions that are made by cat/etc/resolv.conf included in the screen, should he join the file?I just want to confirm my change nameserver! I don't think I need to go check the file... (If? ^^:)) Last changed Trigger12 (06/13/2019, at 10:33) 10:33
