I love this author especially because I find it pure consistency. His message is entirely consistent with his life and history. It makes me read a book with much more confidence, because of the source from which it comes. I also like the deep background of each of his teachings. The instructions in this book are not intended to respond only to our external needs (success, money, etc.) but to satisfy the tinges of our souls and make our lives according to it. Of course, I also love the enthusiasm Samsyo conveys and how easy it is to understand it when he writes. When I allow myself to teach a great lesson to this author, I can't help but wonder how he hasn't noticed before. What I like the least ... The truth is, I can't think of anything.
