In *Monster Hunter World*, it's pretty hard to get ahold of reliable source-hardened Elder Dragon quests, but here's a quick way to farm research. Progression Loops in *Monster Hunter: World* is all about getting the best gear to beat tough monsters, and hardened senior dragons to the top of that list. Finding research to track these powerful beasts in *Monster Hunter: World* can be tricky, but this guide should help players on their quest to be the best monster hunter around. Kick the story to gain access to hardened monsters, you first have to complete the main storyline. Wrong time and have fun. *Monster Hunter: World* received high marks for a reason. Reach Hunter Rank 49 After beating the main storyline, you need to reach Hunter Rank 49. To do this, continue to complete the quests provided to you, namely those that are associated with hunting hardened monsters. These are increasingly powerful versions of monsters found on your way. These challenging enemies will test your abilities and determination, so make sure to bring your best *Monster Hunter* gear to face them. Track Kirin Once you reach HR 49, you will have access to a quest that will ask you to hunt down hardened Kirin, and that's where agriculture comes in. This is something you're going to do for a while, so be prepared. Keep following Kirin around and pick up the tracks, and every time you do there's a chance that you'll get a new investigation for hunting the older dragon. Investigations fall randomly, so it may take a bit to dial up some new investigations. Rinse and repeat after the kirin has stopped and therefore will not leave more tracks without attacking it, but instead hit the return of the quest in the menu to keep the investigation going. Then load back into Kirin Hunt to resume the collection track. If you follow these steps, you should be able to recruit a few hardened senior dragon studies that will get you on the right track to get the best armor sets in the game. While this process is not as exciting as hunting for glorious monsters, it will net you a lot of research to help you outfit faster. For tips and tricks in *Monster Hunter: World* and many other games, be sure to check out our guide section for a lot more. *Monster Hunter: World* is available for PlayStation 4 and Xbox One, with a PC kit later this year. Source: Reddit Assassin's Creed Valhalla Has Gone Gold Tempered Monsters in *Monster Hunter World* (MHW) - special creatures found in special quests. These monsters do more damage and have more health than their High Rank versions. Arch-Tempered monsters do more harm and have health than their hardened versions. Players will find tempered tracks during the study, but won't see the connected monster until go into their investigations. Scout Flies will show the Temperature Monster tracks of the same color as if they were tracking Elder Dragon. Hardened monsters (purple aura) still have the same attacks and paths of motion as the Lower and High Rank versions in their areas. Arch-Tempered Monsters (orange aura) have the same attacks, usually with one or more different attacks. Tend to have more health and harm. At the moment, the only archiving monsters are the older dragons (except Behemoth, Blackvale Waal Hazak, Ruiner Nergigante, Safi'jiva, Shar Ishwald and Velhana) from the quest, which gives you one to three tickets at the end to forge a gamma version of their armor or layered armor. Hardened and testy monsters, with the exception of Dragon Elders, can be captured see the list of event quests for Arch-Tempered Monster quests. Special equipment can be obtained when performing Arch-Tempered quests, such as unlocking multi-layered armor or obtaining materials to make a version of some Gamma armor. Hardened monster levels in the monster hunter world, there is a particularly effective way to quickly farm the Hardened Elder Dragon Investigations.A much of the *Monster Hunter World* mid-end game is fighting what the game calls Hardened Monsters. As we explained earlier, Tempered Monsters are more complex versions of monsters you've already fought with. They hit harder and require you to be on your toes throughout the fight. Hardened research on how you get to fight hardened monsters, but sometimes, research for this special breed of monsters doesn't appear on your list as often as you want. In case you don't know, Insights primarily look at your list of more monster footprints you collect (see our beginner's guide for more). The same goes for Temperature Research, but since you can't control how many of them you find, it gets tricky. However, there is a way you can kind of game the system and collect loads of footprints (enough for two to three studies per hunt). The best way to do this is to go after Nergigante because it tends to leave so many footprints behind. As a farm-hardened Elder Dragon Insights Starting from the top, you must have at least one Tempered Investigation unlocked for Nergigante. Load it up and start at the southwest camp at the elders break. Starting with the southwest camp allows you to pass the time before reaching area 14, which is where the fight will begin. You can either sit and do nothing for five minutes or so, allowing it to generate more traces, or, you can spend that time collecting Beryl deposits - useful material. Sign up for the VG247 newsletter Get all the best bits of VG247 delivered to your inbox every Friday! If you want the most way to do this, there is a certain farming route you can follow that allows you to pick up a lot of Beryl deposits. Watch the video below to see it. When you have exhausted all deposits, return to camp and wait for Beryl deposits respawn (you can track them by browsing the card) and repeat this run until you are satisfied. Then head to the 14th area and start the fight. When Therrgante leaves the area, you will be able to select all the tracks he has left since you loaded the zone. There should be enough for two or three investigations, but you should know that there is no guarantee that they will be hardened investigations. Even so far, it's an easy way to farm them, and some of the research you create will always be Tempered.If you've just started to see tempered monsters in your game, we've recommended reading on the increase in *Monster Hunter World*. This allows you to fill weapons and armor with skills that really come in handy in the endgame, especially when going against tempered Monsters.Tempered Monsters themselves are an excellent resource for endgame material, so the two systems feed into each other. If you're not there yet and some of them don't make sense to you, don't worry! You can still give our *Monster Hunter* Guide a read for a more streamlined learning curve. *Monster Hunter World* is a tight game, and doesn't do a good job of explaining its many systems and mechanics, so it doesn't hurt to look at it every time you need to. Sometimes we include links to online retailers. If you click on one and make a purchase we can get a small commission. For more information, click here. Update: 2019/12/2 20:18 Check out this *Monster Hunter World*: Iceborne guide on how to track hardened monsters and how to get their research quests - including tracks, threat levels, and rewards! Check out what the investigative quests are! What are hardened monsters? More powerful versions of monsters Tempered Monsters in *Monster Hunter World* are powered, more dangerous versions of the game. You can tell it's a hardened monster when their badge is laid out in purple. Activate research quests for confident encounters The only surefire way to encounter hardened monsters is to activate quests that need you to hunt them down. Collect the hardened tracks (traces) you see in the field and check out the Resource Center to investigate quests. Threat levels determine the strength of the monster When you take any tracks (traces) of hardened monsters, it will inform you of its threat level. The higher the threat level, the higher it is in the monster hierarchy, and certainly the more dangerous it is. Tempered monster list by threat levelThreat Level 1 Barrot Pukei-Pukei Paolumu Toby Kadachi Anjanath Radobaan Ration - Threat Level 2 Rathalos Azure Rathalos Pink Ration Legian Hurricane Hurricane Bazilgeuse Diablos Black Diablos Odogaron Deviljho-Threat Level 3 Teostra Kushala Daora Nergigante Waal Hazak Kirin- You must first clear the main story of *Monster Hunter World* and level your hunter rank for you to gain access to hardened monsters. Complete the quests below to unlock access to higher threat levels of hardened monsters. How to unlock The Tempered Mountain Rumble To unlock access to Threat Level 2 hardened monsters collect blue tracks in different regions The best way to unlock hardened monster investigation quests is to collect monster tracks (traces). They are usually green, but you will know that it is a hardened monster if the tracks (traces) are blue. Check how to track big monsters! Get random investigations while collecting tracks you get random investigative searches, even if you collect hardened monster tracks (traces). It's best to just keep picking up and picking up whenever you find one before your chances of getting a hardened monster investigation. Activate The Hardened Monster Investigation at the Resource Center After collecting tracks, head back to Astera and head to the Resource Center. Activate the investigative quest with the monster you want to hunt, and then go on a quest to take the quest. In MHW, hardened Elder Dragons also exist and the best way to find them is to collect their tracks (traces) in regions where you can find them. Then check your resource center if you have an appropriate investigation search to hunt them down. Tempered Elder Dragon Tracks Location Chart When you hunt hardened monsters, you will get more weapons and armor jewelry or jewelry. These elements are essential in making your load more powerful against some monsters. Get Streamstones for Melding and increase the random reward quest you can get for hunting hardened monsters are streams. These are valuable materials needed to merge high decoration rarely and increase weapons and armor. Check how to increase weapons and armor! Get more quest Reward Money Tempered quests rewards you with more money than the usual quests, this is due to the difficulty of defeating these powerful monsters.
