How to pair jam2

Content of the page loaded Jun 9, 2013 7:14 PM in response to SteveD02 In response to SteveD02 I also had the same problem. If you previously had Jam Plus connected to another device, turn off Bluetooth on that device. Now on your Jam Plus you must press and hold the button that has the play and pause signal. Press and hold that button for five seconds or until you see the blue light on the Bluetooth sign starts flashing faster. The Bluetooth sign will be located on the right side next to the plus sign. Once the blue light starts flashing faster, go to the device you want to pair it to. On your device in bluetooth settings you should say Jam or Jam Plus. I should definitely say something about Jam's work. Once you press Jam or Jam Plus on your device will hear the Jam Plus make a sound that lasts 1 second indicating that it is paired with your device. I hope this helped you. June 9, 2013 7:14 PM Useful response (5) Thread response - more options Sep 25, 2013 3:48 PM in response to LoveHarmony In response to LoveHarmony thank you very much!!!! I've been trying to figure this out for 40 minutes! Sep 25, 2013 3:48 PM Answer useful thread response - more options This solution worked for me. I have: iPhone 7S and Jam Plus HX-P240 (3 years old, circa 2015) My iPhone showed the Jam speaker, but showed connection without success when I tried to pair. I tried several fixes, including resetting the speaker. Nothing worked until I followed the chosen suggestion. 1) Jam Plus speaker off. 1) In the bluetooth settings of the selected iPhone Jam Plus, press the small i button and select Forget this device. 2) Bluetooth turned off on iPhone 3) Turned jamPlus on and held down the power button AND the + button (I did it with my left hand - I am right-handed - this free left right hand to make step #4). 4) Simultaneously in the iPhone settings, turned on Bluetooth ON (still holding down the speaker on and + buttons). 5) iPhone discovered jam immediately. I selected it and it connected! NOTE: To test, I turned both off several times and each time it was connected ONLY BY TURNING ON. I didn't need to hit the + again. Where there's a traffic jam, there's a party! www.jamaudio.com read. PAIRING 1 JAM PLUS SPEAKER 1. Turn the speaker and move the speaker mode switch to Mono. 2. Press and hold the power button for 5 seconds. 3. Follow the instructions on your device to pair the unit. 4. Pair your device with the speaker by selecting Jam Plus from your Bluetooth listings on your device or selecting Yes. 5. Press play on your device and use the controls on the unit to adjust the desired volume. PAIRING 2 JAM PLUS SPEAKERS TOGETHER 1. Turn the speaker and move the from speaker mode to L. 2. Turn the 2nd speaker and move the speaker mode switch to R. 3. Press and hold the power button for 5 seconds on the 1st speaker. 4. Press and hold the power button for 5 seconds on the 2nd speaker. 5. Speakers to pair automatically. 6. The pairing process can take up to 30 seconds. When you hear a tone and the JAM2 indicator light is solid white, you can pair the device. 7. Follow the instructions on your device to pair the speakers. 8. Pair your device with the speakers by selecting Jam2 from your Bluetooth listings on your device or selecting Yes. Hey. HAVE WE SEEN YOU HERE BEFORE? Register your speaker in www.jamaudio.com. Information about where you bought it and how you use it is like gold for the people who make these speakers. Make them a solid, will you? By instruction manual and warranty information in Spanish visit us in www.jamaudio.com There are a lot of fresh Jam speakers. Checking them all on www.jamaudio.com speaker ONLY CHARGE IT Charging the speaker is so easy that you've probably already discovered it, but just in case, you have two options: you can charge it with your computer or a power outlet. 1. The cable that comes with the speaker, the one with the USB on one end and the Micro USB on the other, is made to work with your computer. Now get ready for an epic night while your speaker does too. You need approximately 3 hours to be fully charged for 6 hours of party time. CONTROL YOUR DESTINATION... OR AT LEAST YOUR SPEAKER 1. This is the power button, press and hold for 5 seconds to turn on 2. Speaker mode switch 3. The power cord goes here 4. This is where you use a mini cable jack to connect it to old school 5. He talks, too. Switch between languages here 6. Pin 7 language selector. Reset 8. Check out how much juice is in battery 9. Turn the music down (Wait, why do you need to turn it down?) 10. Push it to play, push it again to pause 11. Turn up music 12. This light lets you know when Bluetooth is paired 13. Jam Light 2 BLUETOOTH CONNECTION: IT'S A SETUP® Just like any amazing pair, it starts with a connection, one between the device and the Bluetooth speaker. Here's how it works: 1. We know you're probably going to think, derp with this one, but we have to say it: Make sure that the smartphone, tablet or computer you want to connect to the speaker has Bluetooth. (There. We got him out of the way.) 2. Turn on the speaker (press and hold for 5 seconds) and look for the small flashing light. 3. Do what your device needs you to do on your end. (We don't know what you're using. We're not spies.) 4. Search for JAM PLUS in the Bluetooth list of your device or click YES (whatever appears on your device) and BAM! you're connected. 5. Now press PLAY on your speaker and turn it up, or down if you're lame. You'll probably only have to do this once, unless your device goes through a type of important I-just-dropped-it-in-the-pool. Your device and Bluetooth will meet each time, as long as the speaker is set to Bluetooth and your device's Bluetooth is turned on. If you are connecting to a computer, computer, have some additional steps at that end. You're going to have to get that information from the computer company. Depending on your device, you may be asked to enter a pairing code. If prompted, enter 0000 as the code. Press and hold the PLAY/PAUSE button for 5 seconds to activate pairing mode. Note: If you turn on your Jam Plus but haven't started the party yet, it will turn off automatically after 2 minutes of unseered inactivity. Note: You should never have to do this, but in case the speaker controls are not operable, press the reset button to restart the speaker.™ user's manual charging cable 2. If you want to use the power outlet, you'll need to pick up a power cord with a Micro USB the next time you're in the store, or use any USB AC adapter, including your phone's.
