

Uploading a Greeting to your Audio Guestbook from theVOICEguestbook.com.

1. Record the greeting using any means, ex. Voice Memos on iPhone. You can also use [Voice Recorder](#).
2. Convert your recording to .WAV format using [WAV Converter](#):
 - a. Click *Choose file* and select the audio file:

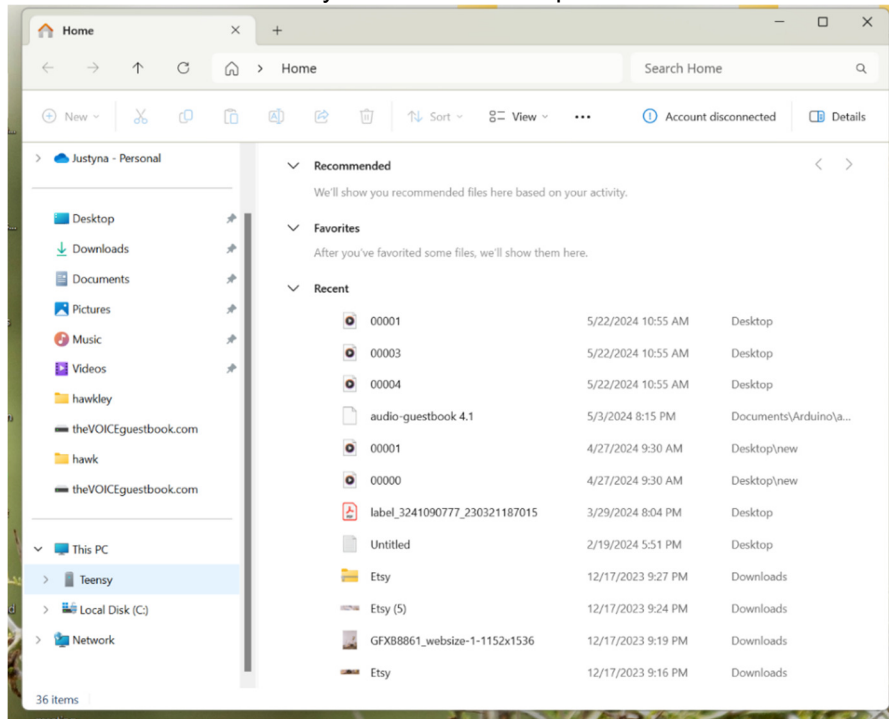

- b. Under *Optional Settings*, click *Change audio frequency* and select *44100Hz*.

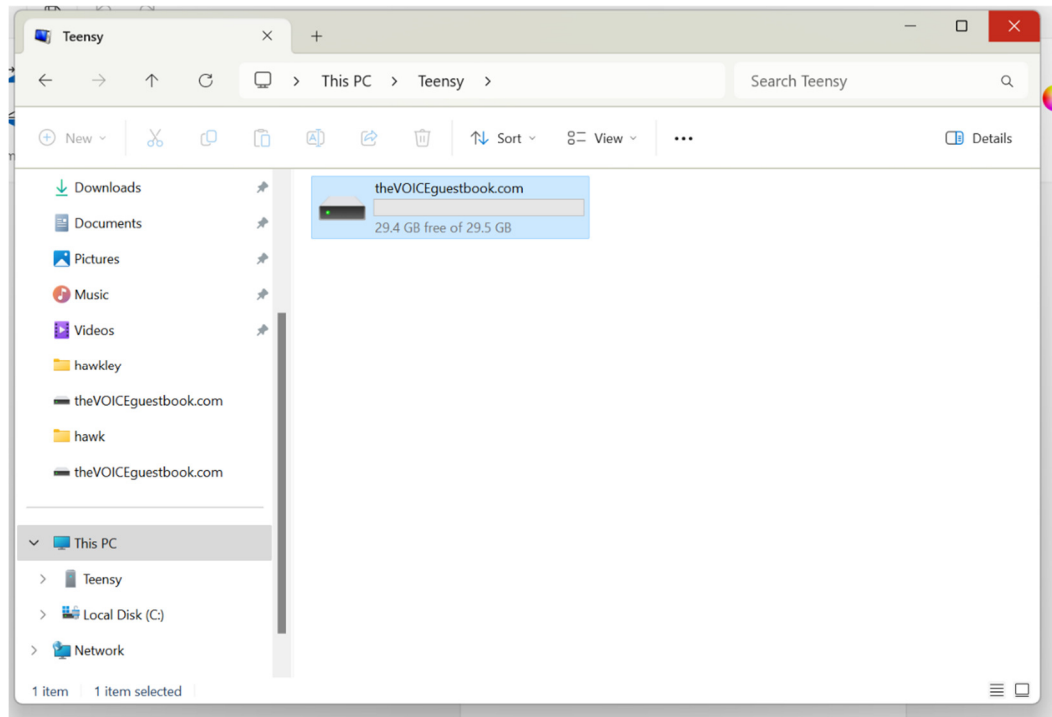

- c. Click *Start*. Once file is converted, click *Download* and save wherever you like.
3. Rename the file to “Greeting”
 4. Copy the “Greeting” file onto the Audio Guestbook:

- a. Plug the audio guestbook into your computer using the USB connection on the phone.
- b. In File Explorer, under “This PC”, on the left hand side, you will see “Teensy.” This is the Audio Guestbook’s memory. Double Click to Open.

- c. A file named “thevoiceguestbook.com will appear”. Double Click to open.

- d. Delete the existing “greeting” file in the folder, and replace it with your newly created greeting file from step 2. Unplug the phone. When you plug back in, you will hear the new greeting. Repeat as required until you are satisfied with your greeting.
