Senior Research Analyst

Arch Reinsurance Ltd. (Bermuda) provides specialty property, casualty and life reinsurance products through reinsurance intermediaries worldwide. These programs range from Property Catastrophe and Property Excess of Loss reinsurance to Professional Liability and Marine Treaties. Our Bermuda-based operation has a strong, proven management team, a commitment to underwriting discipline, and financial strength that is rated A (Excellent) by A.M. Best and A+ by S&P.

Work within the CAT Modelling and Actuarial teams to maintain and develop underwriting and financial reporting systems that support the company's optimized financial risk position in regards to its exposure to natural catastrophes (i.e. earthquakes, hurricanes, floods, etc.) and other manmade exposures.

Duties & Responsibilities:

- Maintaining the company's software and developing methodologies to help the company in its assessment of its exposure to various losses, including catastrophe or manmade risk position by pricing contracts, measuring marginal impact to its portfolio and ranking them based on profitability
- Developing and documenting software packages that integrate third party modelling software with the company's existing software/databases
- Integrating and running pricing software in the day to day underwriting business workflow
- Developing and maintaining Arch's underwriting and financial reporting system in order to assist Actuarial and Financial teams

Minimum Qualifications, Skills & Experience:

- Bachelor's degree in applied mathematics, statistics, actuarial science, or a related quantitative discipline preferred
- Minimum of 7 years' relevant experience performing a similar analytical or research-focused role, with experience gained within the re/insurance industry
- Demonstrated experience supporting underwriting, actuarial, catastrophe modelling, or financial reporting functions within a re/insurance environment
- Advanced proficiency in SQL, MS Access, Visual Basic, and database management systems such as SQL Server (or comparable platforms), as well as strong capability in MS Excel
- Proven ability to develop, maintain, and document analytical tools, software solutions, and methodologies used in underwriting and risk assessment
- Strong analytical, communication, and time management skills, with the ability to operate effectively in a collaborative, cross-functional team environment
- Willingness and flexibility to work outside of normal office hours, including evenings, weekends, and public holidays, where may be required

To apply please send your résumé to bdajobs@expertisegroup.com. All applications are handled in a confidential manner and in accordance with Expertise's Privacy Policy, available on our website.
