of itself, into English language of the versions of the New Testament of the Bible. It was not an older version the
of the New Testament, which already had a Greek text, to translate the New Testament into English. So it is not
surprising that the New Testament was translated into English by different people at different times. The
majority of the New Testament was translated into English by the King James Version. However, many
other translations of the New Testament have also been made, including the Revised Standard Version (RSV),
the New International Version (NIV), and the New American Standard Bible (NASB). Each of these
translations uses different words and phrases to convey the meaning of the original Greek text. While
some versions of the New Testament are more closely based on the original Greek text than others, all
of them are translations and not direct translations. They are all translations of the New Testament,
which means that they are not the original Greek text.
