FOLLOW US FOLLOW US osmino WiFi is the manager of the Wi-Fi network for Android, which, among other things, will help you find all the free WiFi networks around you. Bus stations, grocery stores, restaurants, hotels ... If there is a WiFi network available, the app lets you know. While finding WiFi networks is really useful, it's not the only feature included in Osmino WiFi. It also allows you to check the speed of the network that you are using at the moment, both for download and download speed. This is especially useful if you want to make sure you get the speed you pay. Another interesting feature is the stats record, which saves all the information on the various WiFi networks you've gained access to. The virtual reality option is also interesting; This allows you to search your WiFi network by pointing your Android camera in different directions. Overall, osmino WiFi is a really useful app that helps you find WiFi networks wherever you are. The rest of the features just make it even more interesting and well equipped. USK: All agesContains AdsOffers in the app purchaseFree online and offline cards with Wi-Fi passwords, public and private hotspots around the world! Works even without an Internet connection!osmino Free WiFi App - it's 120 million free WiFi hotspots! Fast and free internet, wherever you are! A free and easy way to find WiFi passwords! On our WiFi map, you can easily find nearby WiFi hotspots, Wi-Fi passwords, wiFi reviews and locations where Wi-Fi is located. You can also share your Wi-Fi password on a well-known network and make it available to other users Free WiFi App, just choose Share. Staying connected on the go has never been easier! osmino WiFi App is an innovative solution to find free Wi-Fi hotspots anywhere No wonder the osmino WiFi App is an absolute success among travelers! On our WiFi map you can find the American major WiFi networks full information:Xfinity Wi-Fi - more than 3 million WiFi hotspots in USAOptimum WiFi - more than 600,000. Wi-Fi in USACable WiFi - more than 600,000 Wi-Fi in USATWC WiFi - more than 300,000 Wi-Fis in USAAT-T - more than 200,000 Wi-Fis in USAAll above listed WiFi networks provide free internet access with time or traffic restrictions. This free Internet access is enough to check your messengers, emails or use navigation.Information about public hotspots is automatically installed on the map, according to data obtained from user devices. If you use a private network password, the access point will also be automatically added to the map. In this way, we create a publicly available Wi-Fi hotspot map based on user data. The more users subscribe to osmino, the more disposable Wi-Fi hotspots there are on the map. Heading to a new location? Going abroad? Don't want to pay for roaming charges? Then discover the available Wi-Fi hotspots at your destination on the Wi-Fi map. Enjoy the ride and free and fast internet around the world. Warning! This is not a wi-fi hacker app!
