London Summer Camp

LSC 2026

27–31 JULY 2026

London Summer Camp (LSC) is a selective residential programme for students aged 16–18 interested in Artificial Intelligence, technology, and innovation. Hosted independently at Imperial College London, the programme introduces students to the world of AI and machine learning through expert-led sessions, hands-on workshops, and collaborative projects. Students gain practical experience with modern AI tools while working with ambitious peers from around the world.

Students will learn:

- Learn the fundamentals of Machine Learning and Artificial Intelligence
- Build AI models using Python
- Work on projects solving real-world problems
- Develop and present an AI venture idea.

The programme includes accommodation in central London, daily breakfast, lunch and dinner, academic seminars and workshops, curated cultural excursions across London, local transport, airport transfers, and a final gala dinner.
