Corrosion in the petrochemical indus

This is also called data search, find information about materials and properties from technical references. Originally published in 1994, this second edition of the Corrosive Petrochemical industry collects peer-reviewed articles written by experts in the field of corrosion that were specifically selected for this book because of their association with the petrochemical industry. This edition extends the coverage of various types of corrosion, including the metallurgical variable effects of corrosion of multiple alloys. It discusses protective methods, including discussion of corrosion inhibitors and corrosion resistance of aluminium, magnesium, stainless steel and nickel. It also includes a section specifically dedicated to oil and petrochemical issues. -- Originally published in 1994, this second edition of corrosion petrochemical industry collects peer-reviewed articles written by experts in the field of corrosion, which were specifically selected for this book because it concerns the petrochemical industry. This edition extends the coverage of various types of corrosion, including the metallurgical variable effects of corrosion of multiple alloys. It discusses protective methods, including discussion of corrosion inhibitors and corrosion resistance of aluminium, magnesium, stainless steel and nickel. It also includes a section specifically dedicated to oil and petrochemical issues. Get LARGE discounts for the selected nace and SSPC names. This edition extends the coverage of various types of corrosion, including the metallurgical variable effects of corrosion of multiple alloys. It discusses protective methods, including discussion of corrosion inhibitors and corrosion resistance of aluminium, magnesium, stainless steel and nickel. It also includes a section specifically dedicated to oil and petrochemical issues. Published: ASM International Published: 2015 Pages: 426 ISBN: 978-1-62708-094-1 Electronic document Download Many of our products are available via electronic download. To access a purchased electronic (PDF) document, the document will appear in the content. (To access the content you have purchased, you must log on to the website. You can also access a purchased document by searching for it and clicking the Download Document button on the Product Information page. Asm International is proud of the fact that UPS is our official courier. All items are shipped through ups ground service domestic service and UPS International for all other shipments. This allows us to provide our members and customers with the most economical, reliable and traceable delivery available on the market. All physical product orders (books, DVD groups, etc.) include a shipping fee calculated based on weight and your geographic location. ASM International receives a discount from UPS because of the volume of delivery we make, and this discount is passed on to you directly. Domestic shipments are usually received within 3-5 business days; international shipments take about 2-4 weeks depending on your specific location. We can offer accelerated shipping services for products that are shipped directly when the need arises. Please contact ASM International Service center 440-338-5151, ext MemberServiceCenter@asminternational.org. Also, if your company has a corporate shipping account with UPS or FedEx, we'd love to use your account number to deliver your products. For assistance with this option, please contact ASM International Customer Service. Order handling orders placed before 2:00 p.m. Please allow three to four weeks for books from other publishers. Refund policy Returns will be accepted 30 days after the invoice date for domestic orders and 90 days after the invoice date of the international orders. The return must be intact and reimbursable. Return income made after the specified time will be charged a 15% restock fee. The restocking fee will be deducted from your total refund amount. The return is done on the customer's invoice. Please use a shipper to track the package. The delivery fee is non-refundable. Industries and applications | Oil and chemical processing materials processing | Characteristics and performance of coating materials | Testing and evaluation of corrosion materials | Failure analysis analysis
