**Every path has its puddle**

Author: English Proverb Quote: Each path has its puddle. April 19, 2019 April 28, 2019 September 10, 2019 March 3, 2020 April 19, 2019 Although we may not be able to see your way, you certainly are not afraid of a puddle. These? What does that mean? For me, this is a very good representation of life in general. We're all on our way. We often reach forks or intersections between the roads. Choosing which path to take next is complex, involving many variables. Yes, there will be an occasional monomaniac on a mission, but most will take a little time to try to figure out what would be the best way for us. This quote reminds us that every road has a puddle. There is no perfect path with absolutely no problems, problems, or puddles. All we can do is prepare for them, and promise to find a way forward despite them. It also helps if our attitude towards puddles is jumping into them with both feet! Yes, we could get a little wet, but unless we're in our best clothes, who cares? Is life about staring at puddles or having fun? Why is our attitude important? It is up to us to determine how we will approach life. Some will insist that life treat them fairly. It's not going to be a happy life, is it? In every life a little rain must fall. And that's where the puddles come from. We can complain about it, or we can be busy and do something about it. The difference between the two is mainly our attitude. Yes, there are things out of our control, but that doesn't mean we sit down and pout, does it? That tactic hasn't worked for me, at least not since I was two. Instead, we can try to change our attitude, and maybe our approach. So often we see an obstacle, and our focus immediately looks at the obstacle, and our attitude goes negative. If we keep thinking of the puddle as the most unpleasant and disgusting thing on the planet, we probably wouldn't want to intervene. If it's just a puddle, and a small one in that, will your attitude be a little different? After all, until you need a boat to cross, it's just a puddle. Where can I apply this in my life? I would apply this to each and every puddle, obstacle, difficulty, or challenge you encounter in your life. How's that for a short list? Why stop somewhere less than that? Are there any puddles you want to be prevented from continuing down the path of your choice? Personally, I try to find some way to make the puddle work for me, or at least have fun while I do it. I'm challenging you. What few steps in the water before crossing? Can I find the shallowest junction? Can I find the places where there are high points and only a few deep steps? I'm also trying to remember where the road is leading me. What is a pair of soggy shoes and socks compared to the reward that awaits me at the end of the road? Again, it's about attitude and a little where to put my focus. I guess that's something anyone can do, with practice. As an example, when I was in second grade, I would often walk home from school for lunch. One day, after a significant spring shower, I jumped in puddles, just for the splash. After all, I had my rain boots on and I wasn't going to get wet all that. Until I jumped into a puddle that a neighboring boy had dug for a fox-hole for playing army, and suddenly he was deep-waisted in the water. Yes, it was pretty wet. Yes, I was pretty cold. But I crouched down home. What else could I do? Sit there and cry? That wouldn't do much, would it? Mom was amazing. He put hot soup on me, went through a bath, put on fresh clothes and went back to school before lunchtime was over. She didn't think of the puddle as anything but a minor nuisance, and she certainly wasn't going to let it ruin the day for any of us. Where are your puddles? Where have you sat by the side of the road and looked helplessly in the face of a puddle? What's waiting for you on the other side? What are you afraid of, if you try to cross the puddle? Has your imagination turned it into a deep lake or a furious river? What would your life be like if you could only overcome that fear, that worry, that insecurity? That doesn't mean being reckless and just taking steps to take action. Think about it, identify what might happen, and take reasonable precautions. That's just common sense, isn't it? But if your goal is to get over your life without getting a little wet, you'll miss the fun that can come from jumping and splashing in puddles. And it will be much harder for you to get anywhere, as each path has its puddle.
