

STAR Proposal

Situation: What is the current condition that you would like to improve?

Tell us what you have seen that interests you enough to investigate further.
What do you want to learn?

Try to craft an essential question, that would help with your overall learning

Task: What is it that you want to do regarding the above situation?

What does your final project/build/writing look like? (Start small. This may require you to look up(research) first to find a small task you can accomplish on your own. Use your brainstorming tools!)

Action: What are the steps that you need to do to reach your task? This is the time to plan out what you will need to do. The actions that you create will probably change as you get started. That is okay; it's part of the process. Plan every step and when you commit to being done. Please, document what you are doing and when you are working on your AMPed project.

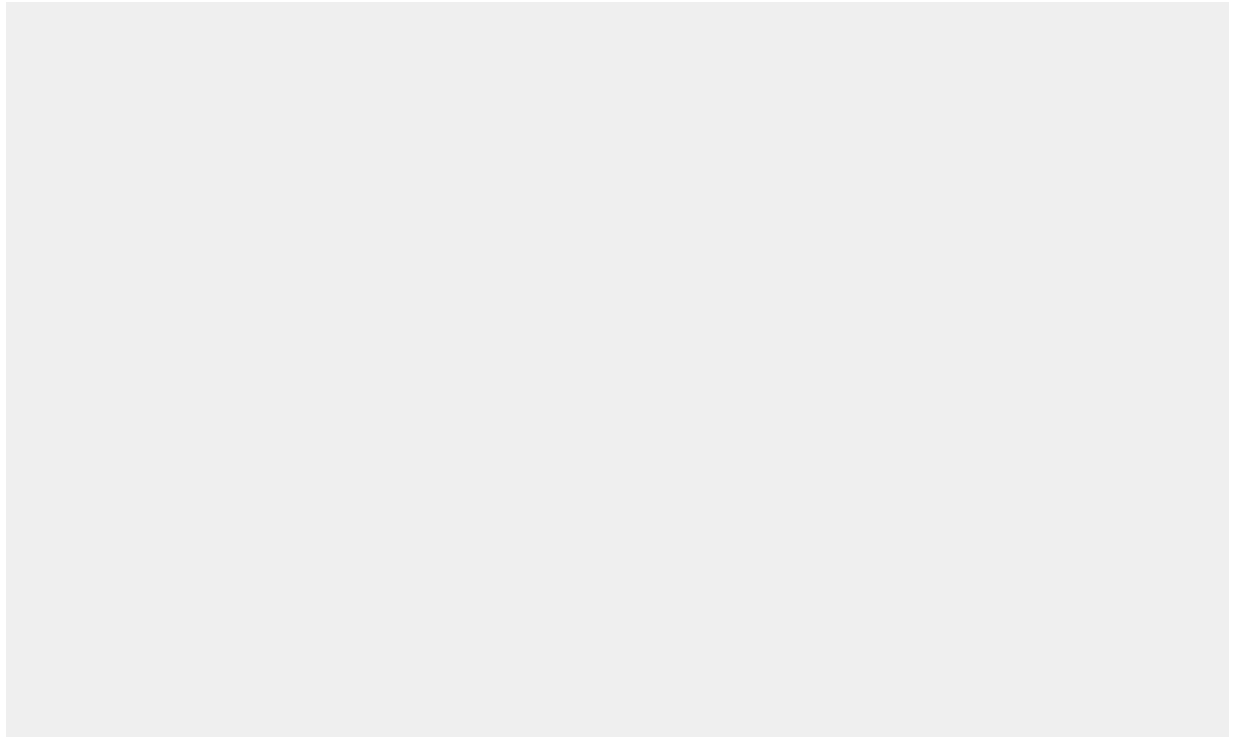

Action/Documentation	Due Date

Action/Documentation	Due Date

Connection to a professional(s) in your interest field, e.g: chef, lead singer of a band, lawyer, programmer, or photographer. This all depends on your task you are trying to complete. You should always cross check with an adult if you are not sure.

Collaborator			
Who			
Profession			
How (ie email)			
Location			

Results: Please show your process and progress; this would include screenshots, videos, photographs. Or you may also record your whole process. Add any notes that you take from your mentor. What are your final thoughts on your project?

Share: Take the opportunity below to tell a story of your AMPed learning journey. Your story may require you to use another documentation tool. When you feel that you have completed your story, share your experience.
