Apple announces the early release of new Mac and iOS operating systems at WWDC every year, and last night the company unveiled iOS 11 and Apple's new operating system macOS 10.13 High Sierra. MacOS Sierra focuses on continuity, iCloud, and operating experience. Apple removed the OS X extension and changed it to macOS due to the nominal similarity to iOS, tvOS and watchOS. Siri has been added to the operating system and users can use it on their Mac. Another new feature of MacOS Sierra is the ability to display image capabilities to the image and several windows that resemble iPad Pro nad Mac computers. Automatic locking is another feature of the operating system, with the ability to unlock your password if you have an Apple Watch in hand. The name Sierra comes from one of the largest mountain ranges in the world in Spain. Apple also used the principle of continuity between the internal components of the operating system and its compatibility with iOS when creating a new version of MacOS. Improving iCloud is another good feature of MacOS Sierra. Apple supports 10 billion files on iCloud users' disks. From now on, the experience with iCloud files on iPhone, iPad, Mac and Macbook will be similar. The new macOS can automatically transfer old files to iCloud, so it won't take up any extra space on your MacBook or Mac.macOS High Sierra 10.13One from the great features of this Siri system, the Siri system is designed with new desktop-only features. Music and message can be even more enjoyable. Enjoy your favorite iOS features, as well as Mac-optimized features. Send messages, create reminders, search the web, and so on. Viewing files, settings, and system information is only possible by asking Siri.It you can copy a quote, image, video, etc. from one app to one device and make it into one app on another device on that operating system. Copy and paste between devices with universal Clipboard.Access files on your Mac with iPhone with iCloud desktop and documents. ˆall files on your desktop or share them on iCloud, store the same files in the Desktop and Documents folder on another Mac. You can easily optimize your Mac by optimizing, storing and freeing up space.
