Q: POST data with node.js is not received by the app I try to create a webapp with node.js I made a test page where I send data to the server using post method. I check if my server receive the data via curl command line curl -X POST -d "user\_id=2&passwd=test" my app config : var express = require('express'), app = express(), server = require('http').createServer(app); var cookieParser = require('cookie-parser'); var bodyParser = require('body-parser'); var session = require('express-session'); app.use(cookieParser()); app.use(bodyParser.json()); app.use(bodyParser.urlencoded({ extended: false })); app.use(session({ secret: 'test', resave: false, save: false }));
