Hi all. I'm really looking forward to Android 7 on Idol 4. Are there any discs released yet or any news from Alcatel? I read somewhere they were planning to release a nougat for an idol of 3/4/4s, but I haven't seen anything about it in a long time. Thank you! I'm glad someone answered! Unfortunately, the average of 2017 seems to me very late. It's a good budget smartphone, but just like any budget phone it's likely to die before that day. Does anyone else have some spicy info on the subject? On November 11, 2016, 6:17 p.m. #4 I called Alcatel and asked if they were working on one of them. All the ladies said she didn't know about any nouga advances for Idol 4. February 8, 2017, 1:58 p.m., Alcatel is one of those companies that announces an incredible number of devices, and it's often difficult to keep track of what's actually available. However, there are three devices that should get a Nougat update, and two of them recently launched with Marshmallow. Alcatel devices with Nougata: Alcatel A3 XL will get an update: Alcatel Idol 4S Alcatel Idol 4 Alcatel OneTouch Idol 3 The Idol 4 is only available on Cricket Wireless, so you'll have to wait and see if cricket is even interested in issuing an update. Previously we asked alcatel executives when Idol 4S will get Nougata, and they said the update will come when the company considers the release of Nougata to be stable.
