**Continue**

Apparently January is a good month to be a Pandora user that rocks an Android device. Earlier this month, Android users were treated to a new update that brought us an alarm clock feature, and now Pandora is bringing its listeners personalized radio recommendations. How it works is pretty simple: every time you create a new radio station, up to six recommendations will appear at the bottom of the screen, giving you suggestions of additional artist channels that you might be interested in. The same offers will also be displayed at the bottom of the station list. Recommendations will change regularly depending on the stations you add (or delete) as well as the songs you thumbs up. This is a very good way to shake up your music collection, go beyond just giving us new songs in our existing artist channels. Of course, this is not necessarily a killer feature, but it's still quite a welcome change. Aside from the new recommendation feature, there doesn't seem to be a way that Pandora has anything else new in store for us just yet, although they promise to continue to expand and improve their recommendations in the future. What do you think of the new feature as the suggestions it gives you or not? In a blog post, Pandora announced that podcasts are now available to all listeners. The Pandora app now has a new tab of Featured Podcasts for you. From there, you can search for your favorite podcast or listen to one that is, well, recommended for you. According to Pandora, he spent last year fine-tuning his Podcast Genome Project dole of personal recommendations. As with the Music Genome Project, the Podcast Genome project looks at several attributes in content categories and signals such as thumbs, badges, fees, and playback. From there, the Podcast Genome Project uses several machine learning approaches to learn your preferences. It also combines these approaches with the curated Pandora team to offer podcast recommendations right up to the episode level. It's a bold statement, but Pandora achieves similar results with his Music Genome Project.As for the catalog, Pandora said, that hundreds of podcasts with more than 100,000 episodes. Podcasts stretch between genres like news, true crime, sports, comedy, music, business, technology, entertainment, children, health and science. You can expect to find popular podcasts like This American Life and Serial. People can sign up here so their podcasts may have included Pandora.It makes sense for Pandora to show podcasts. Competitors like Spotify and Google Play Music also include podcasts that have increased in popularity in recent years. Including podcasts helps Pandora keep up with the competition. We should also note that we have three (yes, three!) podcasts for your Listening. You can find all of them linked below: End of the Line! Want to install a custom Android ROM - in other words, a third-party version of the Android operating system - like CyanogenMod? You will probably be tasked with installing custom recovery, too. All Android devices ship with restored environment preinstalled. This recovery software can be used to restore the device in factory settings by default, update its operating system, and perform other diagnostic tasks. Android's Stock Recovery RELATED: How to Factory Reset Your Android Phone or Tablet When It Won't Boot Android devices come with a Google recovery environment often referred to as stock recovery. You can load into the recovery system by pressing buttons defined by a device like your phone or tablet boots or by issuing an ADB command that loads the device into recovery mode. The Recovery Menu provides options to help restore the device - for example, you can reset the device in its default factory state from here. Recovery mode can also be used for OTA flash files. If you want to flash a new ROM on your device - or re-blink the factory's default ROM file - you'll need to load into recovery mode first. Recovery of stocks is a minimal, limited system. It is designed to be ignored, and usually it can only flash OTA and OM updates provided by the device manufacturer rather than third-party ROMs. Custom Recovery Basics RELATED: 8 reasons to install LineageOS on your Android device Custom Recovery is a third-party recovery environment. The flashing of this recovery environment on the device replaces the default stock recovery environment with a side-by-side, customizable recovery environment. It's a bit like flashing a custom ROM like CyanogenMod - but, instead of replacing your device's Android operating system, it replaces the recovery environment. The custom recovery environment will do the same as restoring Android stock. However, it will also have additional features. Custom restores often have the ability to create and restore backups of devices. Custom restores allow you to install custom ROM. ClockworkMod even offers a ROM Manager app that allows you to access many of these features from the running Android system - this app requires a custom recovery set to work. The popular custom restores ClockworkMod Recovery (CWM) can create and restore backups of NANDroid - backups of the entire Android device file system. ClockworkMod offers a rom manager with a browser file that makes it easy to browse and install DISK! through ClockworkMod Recovery and Control and Backup Recovery. It also has other advanced features that will be useful if you install and deal with custom ROM. Team Win Recovery Project (TWRP) is a sensory recovery environment. Unlike other recovery environments, including the restoration of Android stock by default, which must be controlled by the device's volume and power buttons, the device, The recovery environment has a touch interface that you can use by tapping your fingers on the button screen. TWRP even supports themes. Like CWM, TWRP offers CPI installation and no backup features. CWM and TWRP are the two most popular custom recovery, but other custom restores may be available for some devices. When and Why to Install Custom Recovery These custom recovery environments are most useful when installing custom ROMs on your device, as they provide the backup, recovery, and ROM-flashing features you need. You will need to unlock your device's downloader to install custom recovery on it. Android offers a way to create a complete backup of devices, although this feature is hidden and requires the use of the adb command. You don't need to unlock the loader, install a custom ROM, or even root the device to create or restore a full backup. Install a special recovery when you're messing around with custom ROMs, or if you really want powerful backup features. This is often seen as a prerequisite for installing custom ROM, but it is not always required. For example, the CyanogenMod installation with the CyanogenMod installer will also install ClockworkMod Recovery (CWM). Once installed manuals for custom ROMs are often linked flashing custom recovery, although you can flash custom recovery and continue to use the Android stock system if you just want these backup features. ANSWER: What's the difference between escaping from prison, rooting and unlocking? Typically, custom recovery is only necessary if you plan to flash custom ROM. Most Android users won't even notice the difference between a device with an installed stock recovery system and a custom recovery device. Image Credit: stwn on Flickr, by Jaofen Lee on Wikimedia Commons Last update October 12, 2020 The success of our day depends to a large extent on the quality of our planning. In order not to miss anything in their affairs, some people prefer to list upcoming tasks in a laptop, while others have long started using digital technology solutions. Calendar apps are some of the main tools that are worth using to organize our lives and plan your time carefully. Many people have switched to specific tools; however, there are still some who don't use calendars on a daily basis. They may find some apps inconvenient to use, non-functional or expensive. In this article are going to check out the best calendar apps to help you stay organized. Before downloading, as you are no doubt aware, there are all kinds of calendar apps available. Instead of sifting through hundreds of them, we've selected the 10 best calendar apps you can get. In addition to rave reviews from each of them, we've covered the following aspects when creating this list: User Interface - How you navigate should be smooth and simple. The buttons on the app should be clear, obvious and easy to navigate. Synchronization - whether with other calendar apps or other apps, app synchronization should be easy and improve overall experience with the app. Additional Features - Because there are so many options for calendars, many of these apps offer additional features. These features make apps stand out from other apps and provide a unique experience for you. 1. Any.do CalendarThis has direct integration with the to-do-Do List Any.Do, giving you a unique tandem of two apps. In addition to advanced functionality, Cal Calendar is easy to use. Creating events is very simple and fast. Moreover, depending on the event name, the app automatically adds contacts and geolocation data to the login description. You can even import your lists and entries from Any.do Any.do calendar is a great option for any type of user. This is very convenient and does not over-complicate the display mode. Another good thing is that this tool is available for free, so you can use it without spending a dime on the software. Download the Any.do calendar here!2. The Google Calendar Calendar Calendar is the official calendar for Android devices that has been tested by many users around the world. If you are now trying to get away from it, consider changing your mind. Since this app is installed on most Android devices by default, many users think that there is nothing special about this program. They're wrong. Google has been updating its calendar for quite a few years now, and now it comes in Material Design with advanced event features, direct integration into other Google services (such as support reminders and Google Now), and comes with Exchange support. The program is super easy and won't cost a dime for you. That's good, isn't it? Download Google Calendar here.3. CalendarCalendar is a relatively new app. It works as a web app for both iOS and Android devices. It's an intelligent application that recognizes your contacts, schedules, and tasks. It will also help you plan and organize meetings according to your available time intervals. The good thing about the calendar is that it allows you to sync with other calendars you use, such as the Apple Calendar and Google Calendar. So you can manage all the calendars that you have in one place. The calendar also gives you an analytics of your meetings, giving you a clear idea of how you can improve time management. Download Calendar: Meeting and Planning here.4. CalendarBusiness Calendar's business is aimed at people who use their for business work and planning purposes. It offers different modes with a wide range of configuration capabilities. The app provides the default view mode by month, and events can be marked in different colors. Display/sorting modes can be adjusted (a month, a day, a year, or an event). You can also set up a multi-day viewing mode to see how things look over the next few days. Scrolling up and down moves you by month, and if you check for a few days, they will be shown in more detail. The daytime display mode offers hourly planning, and schedule mode provides a detailed schedule for a single event. The business calendar is a great tool for planning/planning cases, tasks and events. There is support for repetitive events that can be configured in just a few clicks. By purchasing software, you can use it to import and export other calendars, delete, copy, or move multiple events at the same time. The Android Business Calendar app may seem a bit chaotic, but it works fine and easy to work with if you've been playing with it for a while. The full version of the app is available for \$4.99, but you can also find a free version for the test drive app. Download the business calendar here.5. aCalendarCalendar opens our collection of the 10 best calendar apps available on the market today. With its eye-catching design, easy navigation and great functionality, this is one of the most popular calendar apps on our list. Some additional features include color schemes for each case type (48 colors to choose from), different types of demos, different widgets, moon phases, and more. Given its functionality, aCalendar is a reliable calendar app that has an easy-to-navigate interface with three display options. Scroll from side to side allows you to switch between month, week, and day display modes. When you scroll down and up, you move through the calendar at intervals according to your chosen display mode. In addition to the time scheduling feature, aCalendar syncs photos from contact lists or social networks to remind you of birthdays, anniversaries, or any other special dates. The program also supports data transfers through NFC and full-screen widgets, making it easier for you to work with any data. The program is available for free, but you can also get even more features if you buy an advanced version of the software for \$4.99.Download aCalendar here.6. The DigiCal Calendar Calendar calendar is very similar to Cal Calendar in that the app focuses more on design than on its functionality. However, this does not mean that the application does not serve a purpose. With this calendar app, you can sync all calendars and view them in different ways. Along with the main features, this program comes with support from Google Calendar, Outlook, and includes some unique and Functions. You can match keywords with the image or customize a dark theme. The app can even show you the weather forecast for three days. There are many other features that deserve the attention of people who really love to use calendar apps. Download DigiCal DigiCal SolCalendarSolCalendar can be called a universal application. It claims to be an all-in-one digital solution having basic calendar features combined with some other advanced features such as weather forecast for a particular day. The app supports Google Calendar as well as tasks, widgets, lunar calendar and even Foursquare. Those search calendar apps to cover just everything in its functionality. SolCalendar is a program to consider. There are many interesting things in this app; program does an excellent job working in all-in-one mode. SolCalendar test - the app is available for free. You can check it out without buying the service. Download SolCalendar here.8. IRL Event Social NetworkOne of the most unique apps on this list is the IRL Events Social Network app. As you can guess from the title, the main focus is in this social networking app. Unlike other social media platforms, you can assume that this platform functions similarly Meetup.com. This is a site where you can connect with other people in your area who share a similar interest. IRL is that while at the same time providing a convenient calendar for you to plan activities and plan your day. Although it's a secondary focus, you're missing many of the synchronization aspects that other apps have on this list. Even so, because of this huge social function, it's worth considering for those who want to make more connections. Download IRL Events Social Network here.9. Today CalendarToday Calendar is one of the most hip and edgy calendars on our list. The decision was one of the first to really adopt the material design and remains one of the few that adhere to a neat style. The calendar app offers bold colors, simple controls and great functionality. It's not as heavy an app as many others; it won't eat the entire memory of your device. If you're not looking for something complicated and overly functional, today's calendar is what you need. You can always test the app before you pay for it - the program is available for free. Download Today's Calendar here.10. TimepageTimepage is an intuitive calendar app that will manage your time in a way that other calendar apps can't. It offers the extra features that you would expect from other calendar apps: the ability to record events, notifications and reminders, weather, and driving the duration of a particular event. However, the app goes beyond these features in two ways. The first way is that while the app sends you notifications, it also has reminders for you for what goes on. It's a little extra time can you prepare and make adjustments on your day if necessary. The second feature - more importantly - is a heat map when you go to see the full view of your calendar. This heat map shows what days you are busy and other days when you are freer. This heat map provides a quick look to determine widely which days are good to add more events and other tasks. Download Timepage here. Our VerdictSearching for the right application to manage different calendars and plan your busy day can sometimes turn into an obstacle course. Most of us need flexible applications that can be easily used to manage our rigid schedule. The app should have all the necessary time planning features and be intuitive. Stylish design and limitless compatibility also matter. It is not always easy to find such a program. The aforementioned digital calendar solutions fall into the cost of use category. They are modern, multifunctional, light and light. Choose the one you like!
