Its title is a play on the term "plantation" and plants in this context are here in the sense of "earth's inhabitants", hence "mother Earth's Plantasia". The album was first released on cassette tape, though CD was also released. Background The tracks were originally released on four 12" singles. The tracks were originally released on 4 12" singles. Track listing Side 1 "Sacrifice For The Plant" - 1:14 "Taking Over The Planet" - 1:09 "Will We Ever Grow Old" - 1:47 "Visions Of Plenty" - 2:15 Side 2 "Lovely Sound" - 0:58 "My Treasure" - 1:28 "Carnivores Of A Perfect World" - 1:49 "Islands Of Beginnings" - 1:55 Personnel Musicians Mort Garson - lead vocals, piano, synthesizer, synthesizer bass Peter Chilvers - drums Richard Chasen - lead guitar Alan Cuttler - lead guitar Richard Jacobs - bass Production Mort Garson - producer Peter Chilvers - engineer Richard Chasen - engineer Alan Cuttler - engineer Richard Jacobs - engineer Keith Clemmer - engineer References Category:Mort Garson albums Category:1976 albums Category:Ambient albums by English artistsWhen two-dimensional (2D) materials are placed in contact with one another, they can undergo a remarkable conversion of electrons and phonons from one energy band to another, resulting in a remarkable new emergent material system with unique properties. Similar to graphene, a new "magic number" of atoms has been discovered in bilayer graphene that are much more susceptible to the electron–phonon coupling, resulting in much stronger electron–phonon coupling than in monolayer graphene and perfect charge transport without the need for doping. With temperatures up to 400 kelvin, these bilayer graphene superconductors could find use in electronic and power applications. In 1958, William Shockley and Charles D. Hall first proposed that electrons moving in graphene were intrinsically coupled to the lattice of the material. Since then, researchers have demonstrated that using temperature or other perturbations, the band structure of graphene can be modified. However, until now, there has been no known way 520fdb1ae7
