We are committed to expanding your experience with high quality, tools, and support. We believe that everyone deserves to be successful at creating with a powerful tool that gets out of their way, and that is the core idea behind Fireworks. We are a small team that is committed to quality, and, of course, fun. We are dedicated to the idea that our customers should be able to be successful without a lot of fuss. We love to answer questions, and are always trying to improve Fireworks. Today, we are pleased to announce that Fireworks will be free for the next year. Download the update now. **What's New in Fireworks CS3?** The updates introduced in Fireworks CS3 are some of our biggest and most exciting features to date. **Export for Higher Quality** We have a ton of new features and improvements for exporting artwork that are built specifically with end users in mind. You can now export PDFs directly from the tool, from virtually any layer you create in the document. And, more importantly, you now have new options for making sure that your exported files have the quality you expect. **Advanced Object Color** The new, easily customizable object color palette makes it easier than ever to change the colors of an entire shape, group of shapes, or even a picture. Just click on the icon on the color palette for any object, choose a color, and the color will update throughout the document. **A Whole New Look** The look of Fireworks CS3 makes it both clearer and more user friendly than ever. We improved the color, font, and shape rendering of text, and added a series of new graphics effects that allow you to easily and quickly create amazing effects such as stars, swoops, and arrows. **Paint with Fireworks** Fireworks CS3 makes it easier than ever to create a complex painting. Simply select a shape, click on the color palette, and the color will update throughout the document. **HTML5 Code** Fireworks CS3 delivers support for the new HTML5 code view mode. With HTML5, Fireworks CS3 can preview the code in the browser window, as you work, so you can edit, then view and adjust the code at the same time. **And so much more** We have over 150 bug fixes and performance improvements built right into the tool. Do you want to learn more? Take a tour of the update or read about the specific new features 520fdb1ae7
